

Safety in Residential Towers and Apartments

Safe Living... and Commitment to Safety Procedures

"Safety in residential towers is a shared responsibility between residents and building management, and it starts with following instructions and not ignoring warning signs"

Why Do We Care About Safety in Residential Towers?

Towers house a large number of residents and shared facilities

Protecting Residents

and Visitors in the Building

Reducing Risks

from Fires and Smoke

Correct Response

During Emergencies

Protecting Exits

and Corridors from Obstruction

Supporting Emergency Teams

and Building Management

Protecting the Groups

Most in Need of Support

Remember: Every resident has a role in making the building safer

Key Risks in Towers and Apartments

Small hazards can affect the safety of the entire building

Smoke in corridors and stairwells

5

Cooking fires inside apartments

1

Using elevators during a fire

6

Overloading power sockets

2

Leaving children on balconies unsupervised

7

Damaged electrical wiring

3

Storing flammable materials

8

Blocking emergency exits and corridors

4

Message: Small hazards inside an apartment can affect the safety of the entire building

Fire Prevention Inside the Apartment

Prevention starts with daily behavior, especially in the kitchen

**Don't leave
cooking
unattended**

**Keep
flammable
materials away
from heat**

**Don't use
water on
cooking oil**

**Unplug unused
appliances**

**Don't leave
candles
unattended**

**Store
flammable
materials
safely**

**Report smoke
or a burning
smell**

Remember: A small fire inside an apartment can spread its impact to other floors and facilities

Electrical Safety Inside the Apartment

Unsafe use of electricity is one of the leading causes of fires

**Don't overload
the power
sockets**

**Use certified
wiring**

**Avoid damaged
chargers**

**Don't run
wiring under
the carpet**

**Keep
appliances
away from
water**

**Don't touch
them with a
wet hand**

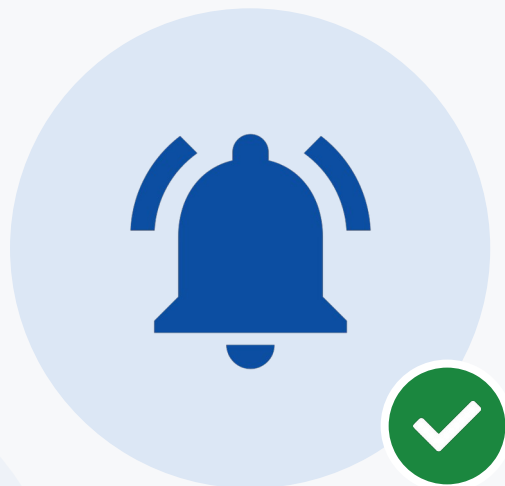

**Request
inspection
from a
specialist**

Message: Don't ignore a burning smell or abnormal heat in appliances

Smoke Alarms Inside the Apartment

Early warning when there's smoke or the start of a fire

Make sure there are working alarms

1

Test them regularly according to the instructions

2

Don't cover the device or disable it

3

Don't remove the battery without reason

4

Notify a specialist if there's a malfunction

5

Get to know the alarm sound and its meaning

6

Remember: An alarm that doesn't work fails to serve its purpose

Emergency Exits and Corridors

Exits are placed to facilitate a safe escape and must always remain clear

**Don't place
furniture in
corridors**

**Don't use exits
for storage**

**Don't lock
emergency
doors**

**Get to know
the nearest
exit**

**Know an
alternative
route**

**Report any
obstacle or
blocked exit**

**Make sure the
guidance signs
are clear**

Message: A blocked corridor can hinder the evacuation of residents during an emergency

Using Elevators and Stairs

Stairs are the safe means of escape during a fire

Elevators ✕

- Don't use it during a fire •
- Don't let children use it alone •
- If it breaks down, press the emergency button •
- Don't try to force the door open •

Stairs ✓

- Use them during evacuation •
- Go down calmly without pushing •
- Hold the handrail when needed •
- Leave room for emergency teams •

Remember: An elevator may break down or stop on a floor affected by smoke or fire

What to Do When You Hear the Fire Alarm

Take it seriously and follow the instructions

Use the nearest safe route

5

Stay calm

1

Don't use the elevator

6

Stop any activity

2

Head to the assembly point

7

Listen to the voice announcements

3

Don't return without official permission

8

Leave personal belongings behind

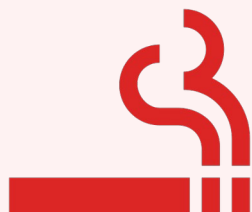

4

Important Message: Don't wait to see smoke or flames before you act

If There Is Smoke in the Corridor

Smoke can be more dangerous than flames

Don't enter a corridor full of smoke

1

Don't open a door with smoke or heat behind it

2

Close the door tightly if the smoke is outside the apartment

3

Stay in a safe spot inside the apartment

4

Call 999 and state your location precisely

5

Follow the emergency operator's instructions

6

Don't go down through a smoke-filled route

7

Remember: Smoke can be more dangerous than flames, and exit must be through a safe route only

Safety on Balconies and at Windows

Special precautions to protect children and prevent falling objects

**Don't leave
children
unsupervised**

**Don't place
chairs near the
edge**

**Don't allow
climbing on
windows**

**Don't throw
objects from
the window**

**Make sure
outdoor items
are secure**

**Don't store
flammable
materials**

**Report damage
to the railings**

Message: The balcony is a space for safe use, not a place for storage or children's play

Shared Facilities in Residential Towers

Facilities are used by everyone, and maintaining them is everyone's responsibility

Follow the management's instructions

Don't tamper with safety equipment

Don't enter service rooms without permission

Keep the facilities clean

Supervise children at the pools

Don't block vehicle routes

Report any hazard or damage

Remember: Shared facilities are used by everyone, and maintaining them is everyone's responsibility

Protecting the Most Vulnerable Groups

Some residents need extra support during evacuation

Children

Movement and curiosity that require supervision

The Elderly

Limited mobility and a need for assistance

People of Determination

Special evacuation arrangements

The Ill

Medications and medical equipment

Pregnant Women

Avoid strain and rushing

Visitors

Unfamiliar with the building

Message: A good safety plan takes into account the needs of all family members

What Do You Do When an Emergency Occurs?

Accurate information helps emergency teams arrive quickly

Information to Provide to Emergency Services:

"Building name • Floor number • Apartment number • Type of hazard • Detailed location"

Stay calm

**Move away from
the source of
danger**

**Notify building
management or
security**

**Call 999 in case
of imminent
danger**

Important Message: Follow the instructions of building management and the competent authorities

Do's and Don'ts in Residential Towers and Apartments

Correct Practices and Others to Avoid

Don't ×

- Don't use the elevator during a fire ①
- Don't block emergency exits ②
- Don't store flammable materials on balconies ③
- Don't tamper with safety equipment ④
- Don't ignore the smell of smoke ⑤
- Don't return to the building without official permission ⑥

Do ✓

- Keep corridors and exits clear ①
- Check the alarms inside the apartment ②
- Use electricity safely ③
- Supervise children on balconies ④
- Get to know the emergency exits ⑤
- Report any hazard immediately ⑥

Interactive Scenarios

Practical Application of What You've Learned

Scenario 2

You noticed thick smoke in the corridor outside the apartment

Correct Action: Don't enter the corridor, close the door, and call 999 and state your location

Scenario 1

You heard the fire alarm inside the residential tower

Correct Action: Stay calm, follow the evacuation instructions, and don't use the elevator

Scenario 4

A child places a chair near the balcony edge

Correct Action: Move the chair away immediately, supervise the child, and don't leave them on the balcony

Scenario 3

You saw boxes blocking the emergency exit

Correct Action: Notify building management immediately to remove the obstacle

Test Your Knowledge

Quick Questions to Assess Your Understanding

Q1: Is it allowed to use the elevator during a fire alarm?

Answer: No, the designated emergency stairs must be used

Q2: Why should corridors be kept free of obstacles?

Answer: To facilitate evacuation and the movement of residents and emergency teams

Q3: What do you do if the corridor is full of smoke?

Answer: I don't enter the corridor, close the door, and call 999

Q4: Is it allowed to store flammable materials on the balcony?

Answer: No, because that increases the risk of fire

Q5: What is the most important action during an emergency?

Answer: Stay calm, move away from danger, report it, and follow instructions

Thank You

Safety in residential towers and apartments is everyone's responsibility

Clear exits • No elevators during a fire • Working alarms • Supervise children • Call 999

"Safe living begins with the residents' awareness and commitment to safety procedures"
