

Safety from Bites and Stings

Your Awareness Protects You from Risks

"Preventing bites and stings starts with being aware of your surroundings and avoiding touching or approaching creatures without knowing them"

Why Do We Care About Safety from Bites and Stings?

They can occur outdoors or even inside homes

Reducing Exposure
to Bites and Stings

Protecting Children
the Elderly, and Allergy Sufferers

Correct Response
When an Injury Occurs

Avoiding Mistakes
that May Worsen the Condition

Awareness During Trips
Camps, and Farms

Comprehensive Protection
for the Family and Surroundings

Remember: Not approaching unknown creatures is the first step in prevention

Where Can Bites and Stings Occur?

Venomous creatures may be found in various places

Waste collection areas

5

Public and home gardens

1

Storerooms and rarely used places

6

Farms and agricultural areas

2

Rocks, grass, and holes

7

Camps and desert trips

3

Areas near standing water

8

Beaches and coastal areas

4

Message: Paying attention to your surroundings reduces the likelihood of exposure to danger

Possible Types of Bites and Stings

They vary depending on the type of creature and the surrounding environment

Bee and wasp stings

Ant and insect bites

Spider bites

Scorpion stings

Snake and reptile bites

Jellyfish stings

Mosquito and flying insect bites

Note: Not all bites are dangerous, but they must be taken seriously when severe symptoms appear

Prevention in Outdoor Areas

Behaviors that reduce exposure to creatures that cause bites or stings

Wear suitable footwear

Don't walk barefoot

Don't put your hand in holes

Check the seating area

Stay away from nests and burrows

Keep food in sealed containers

Don't leave waste at the site

Remember: A clean, organized place reduces the gathering of insects and harmful creatures

Protecting Children from Bites and Stings

Children approach creatures out of curiosity

**Supervise
children
continuously**

**Teach them not
to touch
insects**

**Prevent them
from playing
near grass**

**Make sure they
wear suitable
footwear**

**Don't leave
food
uncovered**

**Teach them to
tell an adult**

**Don't let them
approach nests**

Message: Educating the child in simple language helps them avoid danger

Prevention Inside the Home and Farm

Cleanliness and organization reduce the chances of harmful creatures appearing

**Keep the home
clean**

**Seal openings
and cracks**

**Don't leave
food remains
uncovered**

**Store tools in
an organized
way**

**Check
footwear
before use**

**Trim the grass
around the
home**

**Notify
specialists if
they appear
repeatedly**

Remember: Cleanliness and organization reduce the chances of insects and harmful creatures appearing

Beach Safety from Marine Stings

Marine creatures can cause stings even when they're on the beach

Follow the lifeguards' instructions

Don't touch marine creatures

Avoid swimming near warning signs

Supervise children at the beach

Wear footwear near rocks

Notify the lifeguard when you see a harmful creature

Important Message: Don't touch marine creatures even if they appear dead

What Do You Do for a Minor Sting or Bite?

Stay calm and monitor symptoms after the injury

**Move away
from the
source of
danger**

**Wash the area
with water**

**Avoid
scratching the
injury site**

**Apply a cold
compress if
needed**

**Watch for
abnormal
symptoms**

**Tell an adult or
the official**

**Seek help in
case of severe
pain**

Remember: Monitoring is important because some symptoms may appear some time after the injury

When Is It an Emergency?

Symptoms that require calling emergency services on 999 immediately

Difficulty breathing

1

Swelling of the face, lips, or throat

2

Severe dizziness or fainting

3

Rapidly spreading pain or swelling

4

Vomiting or unusual severe fatigue

5

A snake or scorpion bite

6

Injury to a child or an allergy sufferer

7

Urgent Action: Call 999 immediately if any of these symptoms appear, or if the condition worsens instead of improving

What to Do in Case of a Snake or Scorpion Bite

Stay calm, minimize movement, and contact emergency services immediately

Quick Steps:

Call 999 immediately

Minimize their movement

Keep the injured person calm

Move away from the creature

Don't suck the bite site

Don't apply random substances

Don't chase the creature

State your location precisely

Important Message: Random actions can increase the danger; calling emergency services is the most important step

What Not to Do with Bites and Stings

Common actions that may be unsafe or delay treatment

**Don't scratch
the injury site
hard**

**Don't apply
unknown
substances**

**Don't grab the
creature that
caused it**

**Don't ignore
severe
symptoms**

**Don't delay
seeking help**

**Don't move the
injured person
too much**

**Don't rely on
unapproved
remedies**

Important Rule: When in doubt, seek help from specialists

The Role of Cleanliness and Waste Management

General cleanliness reduces the gathering of insects and creatures

**Put waste in
the bins**

**Don't leave
food
uncovered**

**Clean up food
remains**

**Seal trash bags
tightly**

**Don't leave
standing water**

**Keep the
storerooms
tidy**

**Report insect
gatherings**

Message: Environmental prevention is an essential part of personal safety

Do's and Don'ts for Preventing Bites and Stings

Correct Practices and Others to Avoid

Don't ×

Don't touch unknown creatures

1

Don't put your hand in holes and rocks

2

Don't approach nests and hives

3

Don't walk barefoot outdoors

4

Don't ignore pain or rapid swelling

5

Don't treat serious cases haphazardly

6

Do ✓

Be aware of your surroundings

1

Wear suitable footwear outdoors

2

Supervise children continuously

3

Store food and waste safely

4

Check the seating area before using it

5

Seek help in case of serious symptoms

6

Interactive Scenarios

Practical Application of What You've Learned

Scenario 2

A child was stung and started showing swelling and difficulty breathing

Correct Action: Call 999 immediately and request urgent help

Scenario 1

You noticed a beehive near a seating area

Correct Action: Move away from the site, don't touch the hive, and notify the officials

Scenario 4

A person was bitten by a snake in a desert area

Correct Action: Minimize their movement, don't act haphazardly, and call 999 immediately

Scenario 3

You saw a sea creature on the beach and want to touch it

Correct Action: Don't touch it, and notify the lifeguard or beach official

Test Your Knowledge

Quick Questions to Assess Your Understanding

Q1: Is it allowed to touch an unknown creature in the park or at the beach?

Answer: No, you must move away from it and notify the officials

Q2: What do you do if difficulty breathing appears after a sting?

Answer: I call 999 immediately

Q3: Why should food and waste be stored properly?

Answer: To reduce the gathering of insects and harmful creatures

Q4: Do you walk barefoot in outdoor areas?

Answer: No, it's better to wear suitable footwear to prevent bites

Q5: What do you do in case of a snake or scorpion bite?

Answer: I move the injured person away, minimize movement, and call 999 immediately

Thank You

Safety from bites and stings is everyone's responsibility

Don't touch creatures • Supervise children • Clean up waste • Wear footwear • In emergencies call 999

"Awareness and attention to your surroundings protect you from the risks of bites and stings"
