

Prevention of Traffic Injuries

Your commitment to traffic safety protects you and those around you

"Traffic injuries can be reduced by following safety rules, using protective measures, and paying attention to road users"

Why Do We Care About Preventing Traffic Injuries?

Injuries affect the driver, passengers, pedestrians, and road users

Protecting lives

and reducing injuries

Reducing the severity of accidents

when they occur

The driver's responsibility

toward themselves and others

Protecting children

and the most vulnerable groups

Raising awareness

of safe road behavior

Everyone's safety

on the road

Remember: Safe driving is not just a skill, but a responsibility toward the community

How Do Traffic Injuries Occur?

Unsafe behavior combines with reduced attention

Not securing children in their seats

5

Driving while fatigued

6

Ignoring pedestrians and cyclists

7

Not wearing the seatbelt

1

Using devices while driving

2

Excessive speed

3

Sudden stopping or lane changing

4

Note: Even minor accidents can cause injuries if protective measures are not used correctly

The Seatbelt: The First Line of Defense

Use it on every trip, no matter how short

Fasten it before the vehicle moves

1

Make sure all passengers are buckled up

2

Do not place it behind your back or under your arm

3

Make sure it is fastened correctly

4

Children need an appropriate protective device

5

Essential in both front and rear seats

6

Awareness Message: A short distance does not mean the danger is absent

Children's Safety Inside the Vehicle

Children are the most vulnerable group to hazards during accidents

**A child seat
suitable for
age and weight**

**Install the seat
according to
the
instructions**

**Children in the
rear seats**

**Do not hold the
child in your
lap**

**Do not leave
the child
unattended**

**Make sure
doors and
windows are
closed**

**Teach the child
to fasten the
seatbelt**

Important Note: Holding a child in your arms does not protect them during a sudden stop or accident

Speed and Safe Distance

Excessive speed reduces the driver's ability to react

Adhere to the speed limit

Slow down in school zones

Leave a sufficient safe distance

Increase the distance in rain and fog

Avoid sudden stopping

Be cautious of heavy vehicles

Respect other road users

Message: Speed does not shorten the journey as much as it increases the likelihood of danger

Distraction While Driving

A few seconds of distraction can be enough to cause an accident

**Using
electronic
devices**

**Writing or
reading
messages**

**Being
distracted by
passengers or
children**

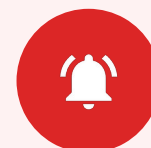

**Eating and
searching for
items**

**Adjusting
systems and
screens while
moving**

**Attending to
things outside
the road**

**Being
distracted by
notifications**

Correct Action: Set your destination before setting off, and stop in a safe place if you need to use devices

Fatigue and Reduced Concentration

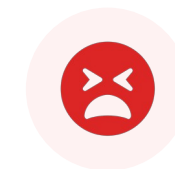

Driving while drowsy reduces attention and response

Preventive guidelines

- Get enough rest before driving •
- Stop when you feel tired •
- Do not drive long distances without rest •
- Do not continue when your concentration is low •
- Consult a specialist if fatigue recurs •

Signs of fatigue

- Frequent yawning •
- Reduced concentration and distraction •
- Difficulty staying in the lane •
- Slow response •
- Heaviness in the eyes •

Important Message: Stopping to rest is a safety decision, not an unnecessary delay

Protecting Pedestrians

Pedestrians are more prone to injury in accidents

**Slow down at
pedestrian
crossings**

**Stop for
pedestrians
when they
cross**

**Be cautious of
children and
the elderly**

**Do not
overtake near
crossings**

**Be careful
when reversing**

**Be careful in
public parking
areas**

**Extra caution
near schools**

For pedestrians: Cross at designated places, and avoid electronic devices while crossing

Safety of Cyclists and Scooter Users

Less protected than vehicle occupants, they need extra attention

**Use a helmet
and protective
gear**

**Stick to the
designated
lanes**

**Avoid blind
spots**

**Use lights and
reflectors**

**Obey traffic
signals**

**Do not use
devices while
moving**

**Check the
vehicle's
condition**

For drivers: Leave a safe distance when overtaking cyclists, and check blind spots

Safety in Buses and Group Vehicles

Extra commitment due to the number of passengers and boarding/alighting movement

**Sit in the
designated
seats**

**Fasten the
seatbelt when
available**

**Do not stand
while the
vehicle is
moving**

**Do not put your
hand or head
out**

**Do not distract
the driver**

**Wait for the
vehicle to stop
before getting
off**

**Respect the
bus
instructions**

For the driver: Make sure the doors are closed and passengers board and alight safely before moving

Visibility and Weather Conditions

Poor visibility or changing road conditions increase the likelihood of injuries

Reduce your speed

Leave a greater safe distance

Use appropriate lights

Avoid sudden lane changes

Extra caution in rain

Extra caution in fog and dust

Stop if visibility becomes insufficient

Message: Driving in changing conditions requires calm, a greater distance, and higher focus

Cabin Interior Safety

Organizing the cabin reduces injuries during a sudden stop

Secure items in the trunk

No sharp items on the seats

Do not block visibility with luggage

Adjust the headrests

Do not put your feet on the dashboard

Sit in a safe position

Organize items and do not pile them up

Note: Unsecured items can move forcefully during a sudden stop and cause injuries

Safety When Entering and Exiting the Vehicle

Safety does not end when the vehicle stops

Make sure the vehicle has come to a complete stop

Exit from the safe side

Watch for children when opening the door

Make sure the side is clear of cyclists

Do not stand between moving vehicles

Accompany children in parking areas

Check the mirrors before opening

Message: Safety continues until you reach a safe place outside the vehicle

Correct Action When a Traffic Accident Occurs

Act calmly and avoid any behavior that increases the danger

Quick Steps at an Accident:

Call 999

Check on the
passengers

Turn on the signals

Stop safely

Do not stand in
the path of
vehicles

Do not move the
injured except
in danger

Do not crowd
around the
accident

Follow the
instructions of
the competent
authorities

Important Note: Crowding around the accident or standing on the road can lead to further accidents

Do's and Don'ts in Traffic Safety

Correct Practices and Others to Avoid

Don't ×

Do not use devices while driving

1

Do not seat children without protection

2

Do not exceed the speed limit

3

Do not tailgate other vehicles

4

Do not open the door before checking

5

Do not move the injured except in danger

6

Do not crowd at the accident site

7

Do ✓

Fasten your seatbelt on every trip

1

Use the appropriate child seat

2

Adhere to the speed limit

3

Leave a sufficient safe distance

4

Watch for pedestrians and cyclists

5

Stop when you feel fatigued

6

Call 999 in case of injuries

7

Interactive Scenarios

A practical application of what you have learned

Scenario 2

A small child is seated without an appropriate safety seat

Correct Action: Use a child seat suitable for their age and size, and install it correctly

Scenario 1

One of the rear passengers refuses to fasten the seatbelt

Correct Action: Do not move the vehicle until all passengers have fastened their seatbelts

Scenario 4

An accident occurs ahead of you and people start to crowd

Correct Action: Move away from the path of vehicles, do not crowd, and call 999 if needed

Scenario 3

You receive a message on your device while driving

Correct Action: Do not use the device; stop in a safe place if a reply is necessary

Test Your Knowledge

Quick Questions to Assess Your Understanding

Q1: Why must you fasten the seatbelt on every trip?

Answer: Because it protects the driver and passengers and reduces injury severity in accidents

Q2: What is the correct action when transporting a small child?

Answer: Use a child seat suitable for their age and size and install it correctly

Q3: What do you do if you feel fatigued while driving?

Answer: Stop in a safe place and take some rest

Q4: What is the action when an accident with injuries occurs?

Answer: Call 999, secure the area, and do not move the injured except in case of danger

Thank You

Preventing traffic injuries begins with your simple decisions

Fasten the seatbelt • Follow the speed limit • Watch for pedestrians • Avoid distraction • Call 999 in case of injuries

"Your commitment to traffic safety protects you and those around you"
