

Kitchen Safety

Prevention begins with attention

"The kitchen is one of the most used spaces, and following safety guidelines reduces accidents"

Why is kitchen safety important?

Heat sources, appliances, and tools that need constant attention

Fire prevention

Cooking and oil fires

Reducing injuries

Burns and cuts

Protecting children

And family members

Electrical accidents

Appliances and wiring

Preventive behavior

Inside the home

Remember: Most kitchen accidents start from a small, avoidable oversight

Causes of kitchen accidents

Unsafe use or leaving heat sources unattended

Leaving
cooking
unattended

Buildup of oils
and grease

Flammables
placed nearby

Damaged
electrical
appliances

Pot handles
facing outward

Unsafe use of
sharp tools

Children near
heat sources

Message: Staying attentive while cooking is the first line of prevention

Prevention while cooking

Constant monitoring at high temperatures

**Do not leave
cooking
unattended**

**Stay in the
kitchen**

**Use a timer as
a reminder**

**Lower the heat
if smoke
appears**

**Keep a lid
nearby for
emergencies**

**Don't get
distracted by
your phone**

**Keep children
away**

Remember: Leaving cooking unattended can cause a fire in a short time

Safety from cooking oil fires

Wrong handling spreads the fire

Don't ✗

No water on oil fires

1

Do not move the burning pan

2

Do not put your face near the flames

3

Do not try to smother it with cloth

4

Do ✓

Safely turn off the heat source

1

Cover the pan with a metal lid

2

Use a suitable extinguisher

3

Move away if the fire spreads

4

Key rule: Water must not be used on oil fires — it can cause the fire to flare violently

Electrical safety in the kitchen

Many appliances can be dangerous if used unsafely

**Follow the
manufacturer's
instructions**

**Check cords
before use**

**Do not use a
damaged
appliance**

**Keep
appliances
away from
water**

**Do not
overload
outlets**

**Unplug what is
not in use**

**Do not touch
with wet hands**

Remember: Water and electricity do not mix in a safe environment

Burn prevention

Steam, hot liquids, and surfaces can cause burns

Use heat-resistant gloves

Open lids carefully

Turn handles inward

Do not carry hot items near children

Let surfaces cool down

Keep hot items away from children

Message: Burns happen quickly; prevention starts with attention

Safety with sharp tools

Essential in the kitchen and need safe use and storage

Use them for
their intended
purpose

Do not leave
them on the
edge

Store them in a
safe place

Do not leave
them in the
sink

Use a stable
cutting board

Keep them
away from
children

Clean them
carefully

Remember: Safe storage of sharp tools reduces cuts and injuries

Child safety in the kitchen

Requires constant supervision near heat sources

Keep children away from the stove and oven

1

Do not leave them unsupervised in the kitchen

2

Store cleaning products out of their reach

3

Keep sharp tools and lighters away

4

Do not leave hot liquids at the edge

5

Use safety locks on cabinets

6

Message: The kitchen is not a safe place for children without supervision

Safe storage in the kitchen

Organization prevents fires, poisoning, and injuries

**Keep
flammables
away**

**Do not place
towels near the
stove**

**Keep cleaning
products in
their original
containers**

**Separate
substances
from food**

**Keep cabinets
organized**

**Close gas
containers
tightly**

**Dispose of
damaged items**

Remember: An organized kitchen is safer for all family members

What do you do if you notice a kitchen hazard?

Early reporting prevents accidents from getting worse

Warning signs

Burning smell

Smoke

Unusual heat

Gas leak

Liquids near electricity

Turn off the appliance if it is safe to do so

1

Move away from the source of danger

2

Do not touch damaged wires

3

Move children away from the area

4

Inform a family member

5

Call 999 in emergencies

6

Do and Don't in the kitchen

Right practices and ones to avoid

Don't ✕

Do not leave cooking unattended

1

No water on oil fires

2

Do not touch electricity with wet hands

3

Do not leave sharp tools exposed

4

No towels or paper near the stove

5

Do not ignore a burning smell

6

Do ✓

Watch cooking continuously

1

Keep flammables away

2

Use appliances safely

3

Store sharp tools in a proper place

4

Keep children away from danger

5

Clean grease buildup

6

Interactive Scenarios

Practical application of what you learned

Scenario 1 Cooking oil has started to smoke

Correct action: Lower the heat or turn it off safely, and don't leave the area

Scenario 2 Cooking oil has caught fire in the pan

Correct action: No water — cover the pan with a suitable lid safely, and call for help

Scenario 3 Unusual heat in an electrical appliance

Correct action: Turn the appliance off safely, unplug it, and inform the responsible person

Scenario 4 A child is approaching the stove while cooking

Correct action: Move the child away immediately and provide constant supervision

Test your knowledge

Quick questions to assess your understanding

Q1: Is it allowed to leave cooking unattended?

Answer: No, cooking must be monitored continuously

Q2: Is water used to extinguish cooking oil fires?

Answer: No, because it can spread the fire

Q3: What do you do if you notice a burning smell from an appliance?

Answer: Turn the appliance off safely and inform the person in charge of the home

Q4: Why should children be kept away from the cooking area?

Answer: To protect them from burns, sharp tools, and heat sources

Q5: What is the best way to prevent kitchen accidents?

Answer: Continuous monitoring, organization, and safe use of tools

Thank you
