

Safety Awareness During Crises and Emergencies

Awareness and readiness... for a safer response

"The correct response in an emergency begins with awareness, calm, and following official instructions"

Why Do We Learn Safety During Emergencies?

Prior preparation reduces risks and protects lives

Readiness

before the emergency occurs

Reducing confusion

and fear during the event

Protecting lives

and property

Knowing evacuation

and assembly points

Family awareness

and the community

The assembly point

A safe, pre-designated location

Remember: An emergency is not a time to experiment, but a time to apply what you've already learned

What Are Crises and Emergencies?

An unexpected event that threatens people's safety and requires a swift, organized response

Fires

Smoke and
alarms

Gas leaks

Power outages

Medical
emergencies

Severe
weather

Crowding and
stampedes

Message: Knowing the type of emergency helps you choose the correct action

Preparation Before Emergencies Occur

Prior preparation reduces losses and helps you act calmly

**Know the
emergency
exits**

**Identify a safe
assembly point**

**Save the
emergency
numbers**

**Prepare a first
aid kit**

**Know the
locations of
fire
extinguishers**

**Train the
family on
evacuation**

**Follow official
alerts**

Remember: Preparation doesn't only mean anticipating danger, but being able to handle it

The Correct Response When You Hear the Alarm

The alarm means act immediately — don't ignore it

Use the nearest safe exit

5

Stop any activity immediately

1

Don't use the elevator

6

Stay calm

2

Head to the assembly point

7

Listen to the official instructions

3

Follow the instructions of the relevant authorities

8

Leave personal belongings

4

Important Message: Don't wait to see the danger before you start moving

Evacuation Routes and Emergency Exits

They must always be clear and free of obstacles

**Know the
nearest exit**

**Know an
alternative
route**

**Keep the
corridors clear**

**Don't use exits
for storage**

**Don't lock the
emergency
doors**

**Follow the
guidance signs**

**Report any
obstacle**

Remember: An obstacle-free exit can save a life during an emergency

Safe Evacuation During Emergencies

Organized evacuation protects people and reduces injuries

Follow the designated evacuation routes

1

Use the stairs only

2

Don't run or push others

3

Help those in need safely

4

Move away from smoke or danger

5

Stick to the assembly point

6

Report missing persons

7

Message: Safe evacuation depends on calm and discipline

The Home Emergency Kit

Essential items that help the family handle sudden situations

Non-perishable food

5

Essential medications

6

Copies of documents

7

Emergency numbers

8

A flashlight

1

Spare batteries

2

First aid

3

Drinking water

4

Remember: The emergency kit must be in a known, easily accessible place

The assembly point

The safe place where people gather after evacuation

**A safe area
away from the
building**

**Make sure
everyone is
safe**

**Organizing
people away
from danger**

**Identifying
missing
persons**

**Facilitating the
work of
emergency
teams**

**Preventing
random return**

**Report before
leaving**

Message to Employees: Reaching the assembly point doesn't mean the emergency is over — wait for instructions

Dealing with Smoke or Fire

Priority is safe exit and seeking help

Move away from the source of danger

Don't approach the smoke

Don't open a hot door

Use the nearest safe exit

Close the doors behind you

Call 999 from a safe place

Message: Saving lives takes priority over property

The most vulnerable groups

Some groups need extra support during an emergency

Children

They need accompaniment and supervision

The elderly

Limited mobility and need for help

People of Determination

Special evacuation arrangements

The ill

Medications and medical equipment

Pregnant women

Avoid strain and rushing

Visitors

Unfamiliar with the site

Message: A good plan accounts for everyone's needs

Dealing with Severe Weather

Following official alerts reduces exposure to risks

Follow official alerts

Avoid going out except when necessary

Stay away from valley waterways

Don't cross flooded roads

Secure outdoor items

Unplug unnecessary appliances

Keep backup lighting

Follow the authorities' instructions

Remember: Following official instructions protects your life and the lives of those around you

What to Avoid During Emergencies

Some actions can increase danger and hinder the response

**Don't ignore
alarm devices**

**Don't use the
elevator during
a fire**

**Don't run or
push others**

**Don't go back
to collect
personal
belongings**

**Don't approach
the site to take
photos**

**Don't spread
unconfirmed
information**

**Don't obstruct
emergency
routes**

Important Message: An emergency requires discipline, not random improvisation

Communication During Emergencies

Correct communication conveys important information without spreading panic

Example of a clear report:

"There is smoke on the second floor of the building, location: street... number..."

State the
location
precisely

Explain the type
of emergency

Call 999 in case
of danger

Don't spread
unconfirmed
information

Remember: A clear, accurate report saves lives and speeds up the arrival of help

Do's and Don'ts During Crises

Correct Practices and Others to Avoid

Don't ×

Don't use the elevator during a fire

1

Don't return to the danger site

2

Don't spread rumors

3

Don't gather around the accident

4

Don't film during an emergency

5

Don't obstruct emergency teams

6

Don't act without official guidance

7

Do ✓

Stay calm

1

Follow official instructions

2

Use emergency exits

3

Head to the assembly point

4

Report any hazard

5

Help others safely

6

Call 999 when needed

7

Interactive Scenarios

Practical Application of What You've Learned

Scenario 2 You noticed smoke in one of the corridors

Correct Action: Move away, don't approach to take photos, and inform the person in charge immediately

Scenario 1 You heard the alarm inside a public building

Correct Action: Stop immediately and follow the evacuation route to the assembly point

Scenario 4 Water has pooled in your path during bad weather

Correct Action: Don't try to cross; find a safe route and follow the alerts

Scenario 3 A family member needs help during the evacuation

Correct Action: Help them if it's safe, and inform the emergency teams

Test Your Knowledge

Quick questions to assess what you've learned

Q1: What do you do when you hear the alarm?

Answer: I move calmly to the nearest safe exit and head to the assembly point

Q2: Is it allowed to use the elevator during a fire?

Answer: No, you must use the stairs only

Q3: What do you do if you notice a gas leak?

Answer: I avoid electricity, leave the site, and call emergency services from a safe place

Q4: Why don't we return to the building after evacuation?

Answer: Because the danger may be ongoing, and returning puts life at risk

Q5: What is the best action during an emergency?

Answer: Staying calm, following instructions, and reporting the hazard

Thank You

Safety during crises and emergencies is everyone's responsibility

Prepare before the emergency • Follow instructions • Head to the assembly point • Don't return to the site • Call 999

"Your awareness and readiness today may protect the lives of those around you tomorrow"
