

Safe Evacuation in the Workplace

Employee commitment is the basis of facility safety

"Safe evacuation in the workplace depends on calm, following instructions, and knowing the exit routes and the assembly point"

Why Do We Learn Workplace Evacuation?

Emergencies can happen suddenly, and preparation saves lives

Protecting everyone

staff, visitors, and clients

Reducing injuries

during emergencies

Organizing the exit

orderly movement out of the facility

Supporting emergencies

facilitating the firefighting teams' work

Preventing stampedes

avoiding confusion and chaos

The assembly point

Making sure everyone is safe

Remember: Knowing the evacuation plan before an emergency helps you act correctly when needed

What Is Safe Evacuation in the Workplace?

An orderly exit to the assembly point according to an approved plan

**Knowing the
emergency
exits**

**Sticking to the
evacuation
routes**

**Responding
immediately to
the alarm**

**Following
safety
instructions**

**Leaving
personal
belongings**

**Not using
elevators**

**Staying at the
assembly point**

Message: Evacuation is not a random exit, but an organized process to protect lives

When Does Evacuation Happen?

Situations that call for leaving the facility immediately

Fire alarm

**Smoke or
burning**

**A fire breaking
out**

Gas leak

**A defect in the
building's
safety**

**An accident
inside the
facility**

**Official
direction**

Remember: Don't wait to see the danger yourself — follow the evacuation directions immediately

When You Hear the Alarm

Take it seriously and don't assume it's a drill

Follow the nearest evacuation route

5

Don't use the elevator

6

Help visitors with guidance

7

Head to the assembly point

8

Stop working immediately

1

Stay calm

2

Turn off devices if it's safe

3

Leave personal belongings

4

Important Message: A fast, organized response reduces risks and protects everyone

Evacuation Routes and Emergency Exits

They must always be clear and free of obstacles

**Get to know
the nearest
exit**

**Know an
alternative
route**

**Don't place
equipment in
the corridors**

**Don't use exits
for storage**

**Don't lock the
emergency
doors**

**Follow the
guidance signs**

**Report any
obstacle**

Remember: An obstacle-free exit can save a life during an emergency

Using the Stairs and Not Using Elevators

The stairs are the safe means of exit during a fire

Use the stairs during evacuation

1

Don't use elevators during a fire

2

Go down calmly without stampeding

3

Hold the handrail when needed

4

Don't stop in the stairwell

5

Leave space for the emergency teams

6

Don't carry large items

7

Message: Elevators may malfunction or stop at a dangerous spot during an emergency

The Employee's Role During Evacuation

Every employee has a role in the success of the evacuation

Reporting those who need help

5

Not obstructing the routes

6

Sticking to the assembly point

7

Waiting for instructions before returning

8

Committing to the evacuation plan

1

Not ignoring the alarm

2

Not returning to the office

3

Helping visitors with guidance

4

Remember: An aware employee's behavior helps protect the whole team

The Role of the Safety Team and Supervisors

Responsible for organizing the evacuation and directing people

Directing people to the exits

Ensuring the routes are clear

Preventing elevator use

Assisting those who need support

Verifying the assembly point

Notifying the relevant authorities

Supporting the implementation of the emergency plan

Message to Employees: Following the safety team's instructions helps achieve a faster, more organized evacuation

Dealing with Visitors and Clients

Visitors are unfamiliar with emergency exits and rely on staff

Calmly direct visitors to the exit

Don't leave a visitor without guidance

Don't put yourself at risk

Inform the safety team about those who need help

Keep guidance brief

Prevent gathering near the exits

Message: Visitors rely on the facility's staff to know the correct action during an emergency

Assisting the Groups Most in Need of Support

Some staff and visitors need extra support

The elderly

Limited mobility and need for help

People of Determination

Special evacuation arrangements

The ill

Medications and medical equipment

Pregnant women

Avoid strain and rushing

The injured

Difficulty moving

Visitors

Unfamiliar with the building

Message: Comprehensive safety means accounting for the needs of everyone in the facility

The Assembly Point in the Workplace

The safe location for staff and visitors after evacuation

Making sure everyone is safe

Identifying the missing

Preventing random return

Making way for emergency services

Head straight to the point

Stay with your team

Report before leaving

Don't return without permission

Remember: The assembly point is an essential part of evacuation, not an optional step

If the Evacuation Route Is Not Safe

The usual route may be blocked by smoke or heat

Don't enter an area of heavy smoke

Use the alternative route

Inform the safety team

Move to a safer spot

Close the doors behind you

Call 999 and state your location

Follow the authorities' instructions

Important Message: Don't risk entering an unsafe route — make your location clear and ask for help

Communication and Reporting During Evacuation

Accurate reporting speeds up the response and reduces risks

Example of a clear report:

"There is smoke on the third floor near the meeting room, and staff have been directed to the east stairwell"

State the facility's name and location

Mention the floor and type of danger

Report those who need help

Avoid spreading unconfirmed information

Remember: A clear, accurate report saves lives and speeds up the arrival of help

Do's and Don'ts During Workplace Evacuation

Correct Practices and Others to Avoid

Don't ×

- Don't use the elevator
- Don't return to the office
- Don't carry items that obstruct
- Don't run or push others
- Don't stand in front of the entrances
- Don't spread unconfirmed information
- Don't ignore the alarm

Interactive Scenarios

Practical Application of What You've Learned

Scenario 2

You noticed a visitor who doesn't know the way out

Correct Action: Calmly direct them to the nearest safe exit, or inform the safety team

Scenario 1

You heard the alarm during a work meeting

Correct Action: Stop the meeting immediately, and follow the evacuation route to the assembly point

Scenario 4

The usual corridor is full of smoke

Correct Action: Don't enter the corridor; use an alternative route or call emergency services

Scenario 3

You left a personal device or documents in the office

Correct Action: Don't go back for them, and continue the evacuation

Test Your Knowledge

Quick Questions to Assess Your Understanding

Q1: What do you do when you hear the alarm in the workplace?

Answer: I stop immediately and follow the evacuation route to the assembly point

Q2: Is it allowed to use the elevator during a fire?

Answer: No, you must use the stairs

Q3: Do you return to the office to get your belongings?

Answer: No, saving lives comes first

Q4: What do you do if you see someone who needs help?

Answer: I inform the safety team and help if it's safe

Q5: Why do we stick to the assembly point?

Answer: To make sure everyone is safe and to prevent random return

Thank You

Safe evacuation in the workplace is a shared responsibility

Know the exits • Respond to the alarm • Use the stairs • Assembly point • Call 999

"Commitment to the evacuation plan makes the work environment safer and more secure"
