

Safety in Accommodations and Camps

For pilgrims — prevention and organization

"Safety in accommodation begins with knowing the place and following the rules"

Why Do We Care About the Safety of Accommodations and Camps?

A large gathering and a need for organization

Protecting the pilgrims

and Umrah performers

Reducing the risks

of fire and suffocation

Facilitating evacuation

during emergencies

Protecting the elderly

and people of determination

Corridors and exits

that are safe and clear

Adherence to the instructions

of the organizers

Remember: Safety in accommodation begins with knowing the place and following the rules

Getting to Know the Accommodation or Camp

Make sure you know everything before settling in

The name of
the building or
camp

The location of
the room or
tent

The nearest
emergency
exit

The evacuation
route

The assembly
point

The location of
safety
equipment

Communicatio
n with the
supervisors

Awareness Message: Knowing the place before an emergency makes the right action easier when needed

Emergency Exits and Evacuation Routes

Clear and free of obstacles

Follow the guidance signs

5

Do not move against the flow

6

Follow the supervisors' instructions

7

Get to know the nearest exit

1

Do not place items in the corridors

2

Do not block the emergency doors

3

Do not use them for storage

4

Note: Blocked or crowded corridors can delay evacuation and increase the danger

The assembly point

The Safe Place After Evacuation

**Know its
location from
the start**

**Agree with the
group**

**No returning
without
guidance**

**No standing at
the entrances**

**Help the
elderly and
children**

**Report missing
persons**

Important Message: Getting out of the danger zone is not enough — you must head to the assembly point and stay there

Fire Prevention Inside the Accommodation and Camp

Avoid sources of danger

**No
unauthorized
heat sources**

**No appliances
running
unnecessarily**

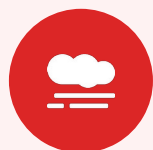

**No flammable
materials**

**No cooking in
unauthorized
places**

**No candles or
open flame**

**Report any
smell of smoke**

**Do not tamper
with safety
equipment**

Note: Sticking to the designated areas for cooking or heating reduces fire risks

Electrical Safety

Improper use causes a fire

Unplug appliances when leaving

5

Report any spark or heat

6

Do not repair faults yourself

7

Do not overload the connections

1

No damaged wires or sockets

2

Do not run wires across the corridors

3

No appliances with wet hands

4

Important Message: Any electrical fault must be reported to the supervisors or competent authorities immediately

Organizing Belongings in the Accommodation

Organization that reduces tripping and obstruction

**Bags in a
designated
place**

**No items in the
corridors**

**No blocking of
the exits**

**Medicines in a
known place**

**Floors free of
obstacles**

**Do not pile
things near the
electricity**

**Documents
easily
accessible**

Note: Scattered items can cause falls or obstruct evacuation during an emergency

Safety in Tents and Camps

Special care due to the nature of the materials

No open flame

No heat near the walls

Clear corridors between tents

No storage of flammables

Cooking in the designated areas

No random wiring

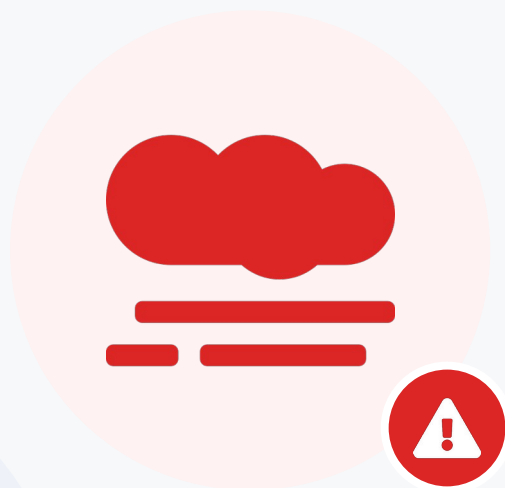

Report any damage

Awareness Message: A safe tent is one free of ignition sources and obstacles

Safety from Carbon Monoxide

A dangerous gas that may be odorless

Electric generators

1

Unsuitable heating devices

2

Charcoal in enclosed places

3

Running vehicles near the accommodation

4

Poor ventilation in enclosed places

5

Headache, dizziness, and nausea

6

Get out immediately and call 999

7

Urgent Action: Get out immediately to an open, safe place, and call 999 if serious signs appear

Safety When Using Generators

Use them only in suitable places

Do not add fuel while it is hot

5

Keep the fuel away from heat

6

Report any fault or smell

7

Do not run it inside the tent

1

Do not use it in an enclosed space

2

Keep it away from sleeping areas

3

Do not touch it with wet hands

4

Important Note: A generator in an enclosed space can cause suffocation or a fire hazard

Safety with Grills and Cooking Sources

In the designated places only

**No grills inside
the tents**

**No charcoal in
enclosed
places**

**Keep the grill
away from the
tents**

**Do not leave it
unattended**

**Make sure the
embers are
extinguished**

**Do not dispose
of ash while
hot**

**Follow the
instructions**

Important Message: Cooking or grilling in an unauthorized place can cause a fire or suffocation

Safety of Restrooms and Shared Facilities

Cleanliness and attention

**Watch for
slippery floors**

**Do not leave
items in the
corridors**

Report leaks

**No appliances
near water**

Keep it clean

**Be considerate
of the elderly**

**Do not block
the entrances**

Note: Wet floors in restrooms can cause falls

Safety of Medicines and Medical Conditions

Preparedness within the accommodation

Medicines in a known place

Away from children

A health information card

Inform the companions

Do not share medicines

Do not stop a prescribed medicine

Request help when symptoms appear

Awareness Message: Health preparedness reduces confusion when an emergency occurs

Safety of the Elderly and People of Determination

A special arrangement in the accommodation

Do not leave them alone when tired

5

Familiarizing them with the exit and assembly point

6

Their medicines in a visible place

7

Sleeping near the exit

1

Clear corridors around them

2

Adequate lighting at night

3

Assistance in shared facilities

4

Important Message: Easing movement and access to exits protects the groups most vulnerable to risk

What to Do When an Alarm Sounds or Smoke Appears

Immediate, calm action

Do not use the elevators

5

Help those who need it

6

Call 999 in case of danger

7

Stay calm

1

Alert those around you calmly

2

Leave non-essential belongings

3

Head to the nearest exit

4

Note: Do not return to the place after leaving except with official guidance

What to Do in a Fire in the Accommodation or Camp

Evacuation first

Evacuate the place immediately if possible

1

Alert those present calmly

2

Head to the nearest safe exit

3

Do not save belongings

4

Do not open a door with smoke coming out

5

Move away from the affected area

6

Call 999 and state the location

7

Important Message: People's safety is more important than property and personal belongings

What to Do When a Group Member Goes Missing

Organized action

**Do not move
randomly**

**Head to the
assembly point**

**Communication with the
supervisors**

**Use the
identification
card**

**Keep the
elderly and
children**

**Children
should not
search alone**

**Request official
help**

Note: Having an assembly point and clear identification information reduces confusion when separated

Do's and Don'ts in Accommodations and Camps

Correct Practices and Others to Avoid

Don't ✗

- Do not obstruct the exits
- No flame inside the tents
- No generator in an enclosed space
- No grills inside the accommodation
- Do not leave appliances running
- Do not crowd during emergencies
- No returning without guidance

1

2

3

4

5

6

7

Do ✓

- Get to know the exits and assembly point
- Keep the corridors clear
- Use electricity carefully
- Report any fault
- Organize belongings in their places
- Be considerate of vulnerable groups
- Call 999 in case of danger

6

7

Interactive Scenarios

A practical application of what you have learned

Scenario 2

You notice a large bag in a corridor between the tents

Correct Action: Move it out of the corridor or inform the supervisors — the corridor must remain clear

Scenario 1

You arrive at the camp and do not know the nearest emergency exit

Correct Action: Immediately get to know the exit, the evacuation route, and the assembly point

Scenario 4

An alarm sounds and some people start gathering their belongings

Correct Action: Leave non-essential belongings, evacuate calmly, and head to the assembly point

Scenario 3

Someone wants to use a grill inside the tent

Correct Action: Stop them — grilling inside a tent is dangerous and can cause a fire or suffocation

Test Your Knowledge

Quick Questions to Assess Your Understanding

Q1: Why keep corridors and emergency exits clear?

Answer: Because they facilitate evacuation and reduce the risk of tripping or delay during emergencies

Q2: Is it acceptable to run an electric generator inside the tent?

Answer: No, running a generator in an enclosed space is dangerous and can cause suffocation or fire

Q3: What is the correct action when smoke or an alarm appears?

Answer: Evacuate calmly through the nearest exit, head to the assembly point, and call 999 in case of danger

Q4: Is it acceptable to return to the accommodation after evacuating to get belongings?

Answer: No, you must not return except with official guidance

Thank You

Safe accommodation and an organized camp mean a safer journey

Know the exits • Organize belongings • No flame in tents • No generator in enclosed spaces • Call 999

"Safe accommodation and an organized camp mean a safer and more reassuring journey"
