

First Aid and Emergency Response

For pilgrims — safe action until the specialists arrive

"First aid does not replace the specialists; it means acting safely until they arrive"

Why Do We Care About First Aid?

An initial action that protects the casualty

Protecting the casualty

from the condition worsening

Reducing confusion

at the emergency site

Facilitating the arrival

of the specialists

Supporting the groups

that are vulnerable

Promoting awareness

of the correct action

Preventing actions

that are wrong

Remember: First aid does not mean replacing the specialists, but acting safely until they arrive

The Basic Rule During Emergencies

Simple, organized steps

**Check that the
place is safe**

**Assess the
casualty's
condition**

Request help

**Safe support
within your
knowledge**

**Move the
crowd away**

**Follow the
emergency
instructions**

Awareness Message: Calm and organization help make the right decision during emergencies

Securing the Scene Before Helping

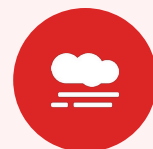

Check for hazards first

**Stampeding or
severe
crowding**

**Vehicle
movement**

Smoke or fire

Exposed wires

A slippery floor

**Heat or
suffocation**

Falling objects

Correct Action: If the place is not safe, move away and request help via 999

When Do You Call the Emergency Number 999?

Cases that require urgent intervention

Loss of consciousness or weak response

1

Difficulty breathing

2

Severe chest pain

3

Severe bleeding

4

Suspected serious fracture

5

Burns, smoke, or fire

6

Sunstroke or convulsions

7

Important Message: If you doubt the seriousness of the condition, do not wait — call 999 immediately

What Do You Say When Calling Emergency Services?

Clear information speeds up the arrival

Is the casualty conscious and breathing?

5

Hazards at the scene

6

A clear contact number

7

The precise location of the case

1

The nearest clear landmark

2

The type of case or injury

3

The number of casualties

4

Note: Speak calmly, and do not end the call unless asked to

Protecting the First Aider and Companions

Your safety is part of the correct action

**Do not put
yourself in
danger**

**Do not enter a
smoky area**

**Use gloves if
available**

**Avoid contact
with blood**

**Ask those
around you for
help**

**Do not perform
an intervention
you do not
know**

Important Message: You cannot help others if you become a casualty too

Reassuring the Casualty

Psychological support reduces confusion

Speak calmly

**Tell them help
is on the way**

**Do not leave
them if it is
safe**

**Do not give
them
unconfirmed
promises**

**Move the
crowd away**

**Protect their
privacy**

Awareness Message: A calm word and simple organization can ease fear and confusion during emergencies

Dealing with Heat Exhaustion

Early action prevents it from developing

Safe cooling

5

Monitor their condition continuously

6

Call 999 if the condition deteriorates

7

Stop the exertion immediately

1

Move them to a shaded place

2

Help them sit down

3

Water only for the conscious and able

4

Note: Signs: fatigue, dizziness, headache, severe thirst, sweating, nausea

Dealing with Sunstroke

An emergency that cannot wait

Call 999 immediately

1

Move them to the shade if it is safe

2

Start cooling the body

3

Ventilation and cold compresses

4

No water for the unconscious

5

Monitor breathing and response

6

Stay with them until the specialists arrive

7

Note: Signs: confusion, loss of consciousness, severe heat, convulsions, rapid deterioration

Dealing with a Fall or Suspected Fracture

Be careful about moving the casualty

Move the crowd away

5

Call 999 if the pain is severe

6

Do not move a head or back injury

7

Do not rush to move them

1

Ask them where the pain is

2

Do not force them to stand

3

Do not straighten the injured limb

4

Important Note: With head, neck, or back pain — do not move the casualty except in case of immediate danger

Dealing with Wounds or Bleeding

Handle the injury safely

Use gloves if available

Apply pressure with a clean dressing

Do not touch the blood directly

Do not remove an embedded object

No improvised materials

Call 999 for severe bleeding

Important Message: Handling bleeding safely begins with protecting the first aider and requesting help when needed

Dealing with Fainting or Dizziness

Help them rest and monitor them

Help them sit down

Move them away from the crowd

Provide adequate ventilation

No food for the unconscious

Monitor breathing

Call 999 if it persists

Note: Do not treat repeated or prolonged fainting as a minor matter

Dealing with Shortness of Breath

A condition that cannot be delayed

Move them to a less crowded place

Help them into a comfortable position

Calm them and reduce tension

Do not force them to walk

Their personal medicine only with their knowledge

Call 999 if it persists

Important Message: Difficulty breathing is one of the signs that calls for not delaying the request for help

Dealing with Convulsions

Calm and preventing injuries

Move dangerous objects away

1

Do not restrain their movement by force

2

Do not put anything in their mouth

3

No water or food during the episode

4

Monitor the time and condition

5

Call 999 if it continues

6

Protect their head from injury

7

Note: Placing any object in the casualty's mouth during a convulsion is a wrong and dangerous act

Dealing with Poisoning or Swallowing a Dangerous Substance

Keep the source of information

**Move them
away from the
source of
danger**

**Do not force
them to vomit**

**No food
without
guidance**

**Note the name
of the
substance**

Call 999

**Follow the
emergency
instructions**

Important Message: In poisoning cases, knowing the substance helps the specialists act correctly

A Simple First Aid Kit for the Pilgrim

Initial handling of minor injuries

**Adhesive
bandages**

Sterile gauze

Medical gloves

**Antiseptic
wipes**

**A compression
bandage**

**Personal
medicines**

**A health
information
card**

**The emergency
number 999**

Note: The kit helps with initial action, but it does not replace requesting help in serious cases

The Health Information Card

It helps the specialists during emergencies

Name

Companions'
contact
number

Name of the
accommodatio
n or camp

Chronic
illnesses

Known
allergies

Important
medications

Essential
health notes

Awareness Message: A small card can help provide the appropriate assistance quickly during emergencies

What to Do When a Group Member Goes Missing

Organized action

**Do not move
randomly**

**Head to the
assembly point**

**Contact the
supervisors**

**Children
should not
search alone**

**Keep the
accommodation
information**

**Request official
help**

Note: Having a clear assembly point before moving reduces confusion when separated

Mistakes to Avoid During Emergencies

Actions that increase the danger

**Crowding
around the
casualty**

**Filming the
casualty**

**Moving the
casualty
unnecessarily**

**Water for an
unconscious
person**

**Medicines
without
guidance**

**Folk remedies
for wounds**

**Delaying
calling 999**

Important Message: The right help is not through haste, but through calm and safe action

When You Hear an Alarm or Official Instruction

Following the instructions calmly

Stay calm

**Listen to the
instructions**

**Do not spread
rumors**

**Move with the
route**

**Help without
obstructing**

**Head to the
assembly point**

Awareness Message: Following official instructions during emergencies protects you and others

Do's and Don'ts in First Aid

Correct Practices and Others to Avoid

Don't ✕

Do not put yourself in danger

1

Do not move the casualty unnecessarily

2

No water or food for the unconscious

3

No medicines without guidance

4

Do not crowd or film

5

No improvised remedies

6

Do not delay requesting help

7

Do ✓

Make sure the scene is safe

1

Call 999 in serious cases

2

Reassure the casualty

3

Move the crowd away

4

Provide first aid within the limits of your knowledge

5

Carry a health information card

6

Follow the specialists' instructions

7

Interactive Scenarios

A practical application of what you have learned

Scenario 2 A person has fallen and complains of severe back pain

Correct Action: Do not move them, secure the scene, move the crowd away, and call 999 immediately

Scenario 1 A pilgrim feels severe dizziness in the crowd

Correct Action: Move them away from the crowd to a safe place, help them sit, monitor their condition, and call 999 if it deteriorates

Scenario 4 An alarm sounds inside the accommodation or camp

Correct Action: Follow the official guidance, leave belongings, move calmly, and head to the assembly point

Scenario 3 A person is unconscious and someone wants to give them water

Correct Action: Prevent giving them water, call 999, and monitor breathing until the specialists arrive

Test Your Knowledge

Quick Questions to Assess Your Understanding

Q1: What is the first step before helping any casualty?

Answer: Making sure the scene is safe and there is no danger to the first aider or the casualty

Q2: When should you call 999?

Answer: At loss of consciousness, difficulty breathing, severe bleeding, a serious fall, or sunstroke

Q3: Is it acceptable to move a casualty complaining of severe back pain?

Answer: No, except in case of immediate danger, and help must be requested immediately

Q4: Why prevent crowding around the casualty?

Answer: Because it obstructs ventilation and the arrival of help, and increases confusion

Thank You

Awareness and calm during emergencies can make a difference in protecting lives

Your safety first • Do not move the casualty unnecessarily • Do not crowd • Call 999 in case of danger

"Awareness and calm during emergencies can make a difference in protecting lives"
