

The Correct Response When the Alarm Sounds

A calm response... and safety for all

"The alarm is not a passing sound, but an early warning that calls for calm and following safety procedures immediately"

Why Should the Alarm Be Taken Seriously?

It may indicate a fire, smoke, or an emergency

Protecting lives

the priority of every
emergency plan

Reducing injuries

a fast response

Enough time

for an organized
evacuation

Preventing chaos

avoiding stampedes

Supporting emergencies

facilitating the teams'
work

Accounting for those present

confirming safety

Remember: Don't wait to see the danger before you start acting

What Does It Mean When the Alarm Sounds?

A possible danger or alert that calls for attention

Presence of smoke

The start of a fire

A rise in temperature

Gas leak

A fault in the safety system

An approved evacuation drill

Direction from the relevant authorities

Message: Even if the alarm is a drill, it must be treated as a real situation

When Must You Move Immediately?

Signs that call for an immediate response without delay

**The alarm
sound**

**A burning
smell**

Seeing smoke

**A rise in the
room's
temperature**

**Official
direction**

**Voice
announcement
s**

**Unusual
movement**

Remember: Every second in an emergency matters; don't wait to be sure before moving

The Correct Action As Soon As You Hear the Alarm

Stop the activity and get ready to move

Head to the nearest safe exit

5

Use the stairs

6

Head to the assembly point

7

Don't return except with official permission

8

Stop any activity immediately

1

Stay calm

2

Listen to the instructions

3

Leave personal belongings

4

Important Message: Staying calm helps you make the right decision quickly

Following the Evacuation Routes

Designed to guide people to the safe exits

**Follow the
guidance signs**

**Use the
nearest safe
route**

**Know an
alternative
route**

**Don't block the
corridors**

**Don't walk
against the
flow**

**Don't stop in
the corridors**

**Report any
obstacle**

Remember: A clear, obstacle-free route speeds up evacuation and protects everyone

Using the Stairs and Not Using Elevators

The stairs are a safe choice in an emergency

Use the designated stairs

1

Don't use elevators when the alarm sounds

2

Go down calmly without stampeding

3

Hold the handrail when needed

4

Don't stop inside the stairwell

5

Don't carry items that hinder movement

6

Leave space for those who need help

7

Message: The elevator may malfunction or stop on a floor affected by the danger

If You Notice Smoke During the Alarm

Extra caution and not approaching the source of danger

Close the doors behind you

5

Move to a safer spot

6

State your location precisely when seeking help

7

Stay low while exiting

8

Move away from the smoke

1

Don't enter a smoke-filled corridor

2

Don't open a door with heavy smoke

3

Use a safe alternative route

4

Remember: Smoke can impair vision and breathing, so don't underestimate it

The Assembly Point After Evacuation

The safe location for confirming everyone's safety

**Making sure
everyone is
safe**

**Identifying the
missing**

**Organizing
people away
from danger**

**Making way for
emergency
services**

**Preventing
random return**

**Stay at the
point**

**Report before
leaving**

Message to Employees: The assembly point is an essential part of evacuation, not an optional step

What Should Be Avoided When the Alarm Sounds?

Behaviors that delay evacuation and put others at risk

Ignoring the alarm sound

Going back for belongings

Using the elevator

Running and stampeding

Filming the event

Opening doors with smoke

Message: Safe exit matters more than property or filming

Dealing with the Groups Most in Need of Support

Some people may need extra help

Children

Slower movement and need for guidance

The elderly

Limited mobility

People of Determination

Special evacuation arrangements

The ill

Difficulty moving

Pregnant women

Avoid strain

Visitors

Unfamiliar with the building

Message: Safety covers everyone and is incomplete without accounting for the most vulnerable groups

The Alarm at Home

Act quickly and get family members out

Alert family members immediately

Use the nearest safe exit

Don't look for belongings

Head to an outdoor assembly point

Don't return to the house

Call 999 from a safe location

Teach children the alarm sound

Follow the authorities' instructions

Remember: A home escape plan makes the response faster and more organized

The Alarm in the Workplace and Public Facilities

Following the directions of supervisors and the safety team

Stop the activity immediately

Follow the safety instructions

Calmly direct the visitors

Use the stairs and exits

Don't use the elevators

Head to the assembly point

Don't leave before the instructions

Important Message: Collective commitment reduces chaos and helps achieve a safe evacuation

Reporting and Communication During the Alarm

Accurate information helps enable a fast response

Example of a clear report:

"There is smoke in the east corridor on the second floor, and several people are heading to the stairwell"

State your
location
precisely

Mention the
type of danger

Report those
who need help

Don't spread
unconfirmed
information

Remember: A clear, accurate report saves lives and speeds up the arrival of help

Do's and Don'ts When the Alarm Sounds

Correct Practices and Others to Avoid

Don't ×

- Don't ignore the alarm
- Don't use the elevator
- Don't go back for belongings
- Don't run or push others
- Don't approach the smoke
- Don't spread unconfirmed information
- Don't return before official clearance

Interactive Scenarios

Practical Application of What You've Learned

Scenario 2

People are heading to use the elevator during the alarm

Correct Action: Calmly direct them to use the stairs, and inform the safety team

Scenario 1

The alarm went off while you were inside a public building

Correct Action: Stop immediately, and follow the evacuation route to the assembly point

Scenario 4

You left the building and remembered an important item

Correct Action: Don't return to the building, and wait for official instructions

Scenario 3

You noticed smoke in the corridor near the exit

Correct Action: Don't enter the corridor; use an alternative route or ask for help

Test Your Knowledge

Quick Questions to Assess Your Understanding

Q1: What do you do when you hear the alarm?

Answer: I take it seriously and follow the evacuation instructions to the assembly point

Q2: Is it allowed to use the elevator during a fire alarm?

Answer: No, you must use the stairs

Q3: What do you do if the corridor is full of smoke?

Answer: I don't enter the corridor, and I use an alternative route or ask for help

Q4: Why don't we return to the building after getting out?

Answer: Because the danger may be ongoing or not visible

Q5: Why is the assembly point important?

Answer: Making sure everyone is safe and organizing people away from danger

Thank You

The correct response to the alarm is everyone's responsibility

Don't ignore it • Stay calm • The stairs • Assembly point • Don't return • Call 999

"A calm, organized response when the alarm sounds can save lives"
