

Managing Crowd and Public Facility Risks

Planning, organization, and safe guidance of the public

"Danger in crowds does not result from numbers alone, but from poor organization and sudden reactions"

Why Do We Care About Managing Crowd Risks?

Large numbers require clear organization

Reducing stampedes
and overcrowding

Protecting the groups
that are vulnerable

Facilitating access
to the exits

Enabling teams
to respond

Preventing crowding
around accidents

Everyone's safety
in the facility

Remember: Danger in crowds does not result from numbers alone, but from poor organization and sudden reactions

What Is Meant by Crowds and Public Facilities?

Places that receive large numbers of visitors

Shopping malls

Public parks

Stadiums and
halls

Events and
festivals

Transport
stations

Tourist
beaches

Government
buildings

Public
occasions

Note: Every place that receives large numbers of visitors needs a clear plan to manage movement

The Main Crowd Risks

They appear when organization is weak

Stampeding at the exits

Crowding in the corridors

Losing children

Tripping and falling

Difficulty for emergency services to reach

Crowding around accidents

Confusion when the alarm sounds

Blocking emergency exits

Awareness Message: Corridors and exits are not gathering places, but routes for movement and safety

Advance Planning for Crowds

It prevents many risks

**Estimating the
expected
number**

**Entry and exit
routes**

**Assembly
points**

**Clear guidance
signs**

**Organizing and
guiding teams**

**An emergency
plan**

**Access routes
for response**

**Consideration
for vulnerable
groups**

Important Message: The clearer the planning before the event, the easier the response during an emergency

Entry and exit routes

An essential element of crowd safety

**Separating
entry from exit**

**Clear and open
exits**

**No standing in
the corridors**

Guidance signs

**Guiding the
public calmly**

**No
unnecessary
barriers**

**Routes for
people of
determination**

Note: Any small obstacle in a crowded route can cause delay or a stampede

Emergency Exits and Assembly Points

Known and clear before the emergency

**Marking exits
clearly**

**No blocking of
guidance signs**

**Doors free of
obstacles**

**Identifying the
organizers**

**Directing to a
safe point**

**No standing at
the entrances**

**Return only
after the
specialists'
permission**

Awareness Message: A safe exit does not end at the door, but upon reaching a safe assembly point

Managing Congestion Inside Facilities

Continuous monitoring of density

Distribute the public across the entrances

5

Guide using loudspeakers

6

Stop entry at the safe limit

7

Monitor density in narrow areas

1

Open additional routes when needed

2

Organize queues clearly

3

Prevent crowding in front of elevators

4

Note: Congestion, if left unmanaged, can turn into a hazard within minutes

Safety of Children, the Elderly, and People of Determination

Special consideration in crowds

Suitable routes

Clear
assistance
points

Directing
families to safe
areas

Do not leave
children

Seats for the
elderly

Assistance
without
crowding

A procedure
for lost-person
cases

Important Message: Crowd safety is measured by how well the groups most in need of support are protected

Communication and Guidance During Crowds

A clear message reduces confusion

Clear guidance signs

Calm audio announcements

Visible organizing staff

Maps of the exits

Awareness messages

Instructions in suitable languages

Guidance away from danger

Awareness Message: A clear message at the right time can prevent congestion and stampedes

Crowding Around Accidents

It increases the danger and obstructs help

Obstructing emergency teams

1

Increasing crowding at the danger

2

Additional injuries to the crowd

3

Disrupting the evacuation

4

Violating the privacy of the injured

5

Distracting the organizers

6

Move away and call 999 if needed

7

Urgent Action: Move away from the accident site, and leave room for the organizers and response teams

Filming and Posting During Accidents

An irresponsible act that can cause harm

Do not film the injured

Do not post photos or clips

Do not stop to film

Do not approach out of curiosity

Do not obstruct the organizers

Important Message: In emergencies, your role is to move away and request help, not to film or post

Evacuation in Public Facilities

Calm and following instructions

Help those who need it if possible

5

Do not go back for belongings

6

Head to the assembly point

7

Listen to the official instructions

1

Head to the nearest safe exit

2

No running or pushing others

3

No elevator during a fire

4

Note: Rushing during evacuation can be more dangerous than the reason for evacuation itself

Responding to the Alarm or Emergency Announcement

Act seriously and immediately

Do not move against the crowd

5

Do not stop in the corridors

6

Call 999 in case of danger

7

Stop the activity immediately

1

Listen to the instructions

2

Follow the exit directions

3

Do not argue with the organizers

4

Awareness Message: The alarm is not a time for hesitation, but a time for organized action

The Role of Organizers and Facility Management

The primary responsibility for safety

**Monitoring
crowd density**

**Organizing
entrances and
exits**

**Clarity of
emergency
exits**

**Training the
organizing
teams**

**A plan for
vulnerable
groups**

**Coordination
with the
specialists**

**Preventing
crowding**

Important Message: Successful crowd management relies on a team that knows its role before emergencies

The Role of the Public

An essential partner in safety

**Adhering to
the
instructions**

**No standing in
the corridors**

**No stampeding
or pushing**

**Report any
danger**

**Watching the
children**

**Do not crowd
or film**

**Heading to the
assembly point**

Important Message: One person acting wrongly can affect the safety of an entire group

Crowd Management at Outdoor Events

Multiple entrances and heat

**Clear pathways
for movement**

**Water and rest
points**

**Signs for
services**

**Organizing
queues**

**Areas for lost
children**

**Monitoring
near the
stages**

**Separate
emergency
routes**

Note: Large outdoor spaces do not mean the absence of danger — organization remains essential

What to Do When a Stampede Occurs?

Calm reduces injuries

Stay calm

1

Do not push others

2

Follow the direction of movement

3

Avoid narrow corners

4

Look for a less crowded space

5

Help children if possible

6

Call 999 in case of injuries

7

Important Message: Calm and reduced pushing help reduce injuries in crowds

Managing Risks Before Visiting Facilities

Simple preparation makes a difference

**Know the
entrances and
exits**

**A meeting
point for the
family**

**Watching the
children**

**Do not carry
large items**

**Suitable
footwear**

**Following the
instructions**

**Stay away from
severe
congestion**

Awareness Message: Simple preparation before a crowded place helps you act better

Do's and Don'ts in Crowds

Correct Practices and Others to Avoid

Don't ✕

Do not stampede or push

1

Do not crowd around accidents

2

Do not film the injured

3

Do not stand in the corridors

4

No elevator during a fire

5

Do not go back for belongings

6

Do not ignore the alarms

7

Do ✓

Follow the organizers' instructions

1

Know the nearest safe exit

2

Keep the exits clear

3

Watch the children and companions

4

Stay away from accident sites

5

Call 999 in case of danger

6

Head to the assembly point

7

Interactive Scenarios

A practical application of what you have learned

Scenario 2

A person falls in a crowded corridor and people start to gather

Correct Action: Move the crowd away, leave space, inform the organizers, and call 999 in case of injury

Scenario 1

Severe congestion occurs at an exit gate during an event

Correct Action: Follow the organizers' instructions, do not stampede, head to a safe alternative exit, and keep your movement calm

Scenario 4

A child gets separated from their family in the crowd

Correct Action: Inform the organizers or security immediately, do not let them wander alone, and direct the family to the assistance point

Scenario 3

You hear an announcement to evacuate a shopping mall

Correct Action: Follow the instructions, head to the nearest safe exit, no elevator, and reach the assembly point

Test Your Knowledge

Quick Questions to Assess Your Understanding

Q1: What is the most important measure to reduce crowd risks?

Answer: Organizing entry and exit routes, keeping exits clear, and following the organizers' instructions

Q2: Why should crowding around accidents be avoided?

Answer: Because it obstructs the arrival of help, increases congestion, and exposes the crowd and the injured to additional risks

Q3: What do you do when you hear an evacuation announcement?

Answer: Follow the instructions, head calmly to the nearest safe exit, and do not go back for belongings

Q4: What is the correct action during an immediate danger in a crowd?

Answer: Move away from the danger, inform the organizers, and call 999 if needed

Thank You

Planning, organization, and public commitment protect everyone during emergencies

Do not stand in corridors • Do not crowd • Follow the organizers • Call 999 in case of danger

"Crowd safety is a shared responsibility that begins with each person's awareness"
