

Safety of Groups Most Vulnerable to Risk

Safe support and respect for privacy and dignity

"A plan that does not account for the groups most vulnerable to risk is an incomplete plan"

Why Do We Care About These Groups?

They may not be able to act like others

Reducing injuries
in emergencies

Speed of evacuation
and assistance

Preventing leaving them
in danger

Health needs
and mobility needs

Solidarity and responsibility
community-wide

Protecting dignity
and privacy

Remember: A plan that does not account for the groups most vulnerable to risk is an incomplete plan

Who Are the Groups Most Vulnerable to Risk?

According to age, condition, and ability

Children

The elderly

People of
determination

The sick and
injured

Pregnant
women

Mobility
difficulties

Hearing or
vision
difficulties

Visitors
unfamiliar with
the place

Note: The goal is not to label people, but to know who needs additional support during an emergency

The Main Challenges They Face

Different difficulties during evacuation

**Difficulty
descending
stairs**

**Difficulty
understanding
instructions**

**Fear and
confusion at
the alarm**

**A need for
medicines and
devices**

**Difficulty
communicatin
g**

**Dependence
on a
companion**

**Greater impact
from smoke**

Awareness Message: Knowing the challenges in advance helps create a realistic and safe plan

Children During Emergencies

Fear, hiding, and following others

Do not leave them unsupervised

5

Keep them away from heat and water

6

Teach them to ask the responsible person for help

7

Teach them the number 999 according to age

1

Train them not to hide

2

Teach them to follow the responsible person

3

Designate a family assembly point

4

Important Message: A child needs simple, repeated teaching, not a one-time instruction

The Elderly During Emergencies

More time to move and assistance

Keep the home's corridors free of obstacles

5

Contact numbers in a visible place

6

Do not leave them during warnings

7

Know their health needs

1

Prepare a mobility aid

2

Do not rush them in a way that makes them fall

3

Assign a person to assist them

4

Note: Safely evacuating the elderly requires calm and support, not haste

People of determination

Special arrangements as needed

Clear and simple instructions

5

Respecting privacy and dignity

6

Inform the response teams of the location

7

Ask them about the best way to help

1

Do not move a device without permission

2

Know the suitable evacuation routes

3

A plan that accounts for mobility, hearing, and vision

4

Important Message: The right help begins with respecting the person and their needs, not assuming what suits them

The Sick and Those with Medical Conditions

Medicines, devices, and special monitoring

**Keeping
medicines in a
safe place**

**A list of the
condition and
medicines**

**Charging the
medical
devices**

**No medicines
without
guidance**

**Call 999 if the
condition
deteriorates**

**Inform the
responders of
the
information**

Note: Health information helps the specialists, but it must be kept with respect for privacy

Pregnant Women During Emergencies

Extra consideration for the mother and the fetus

**Keep her away
from crowds**

**A safe exit
route**

**No long
standing in the
heat**

**A place to sit
when tired**

**Call 999 in case
of danger**

**No medicines
without
guidance**

Awareness Message: Calm and reducing strain during emergencies are important to protect the mother and the fetus

Vulnerable Groups at Home

Environmental preparation to reduce risks

**Removing
obstacles from
the corridors**

**Securing the
carpets**

**Keeping
hazardous
materials away**

Smoke alarms

**An escape plan
that accounts
for everyone**

**The number
999 in a visible
place**

A first aid kit

Note: Most home accidents can be reduced through organization and daily monitoring

Vulnerable Groups in Public Facilities

Arrangements that include everyone

**Accessible
routes**

**Clear,
unobstructed
exits**

**Clear guidance
signs**

**Training the
staff**

**Assistance and
guidance
points**

**Preventing
crowding**

**A plan for lost
children**

Important Message: A safe facility is one everyone can use and exit safely

Safety During Evacuation

A clear order that protects everyone

Do not carry items that hinder movement

5

Head to the assembly point

6

Inform the responders about those who need help

7

Do not leave vulnerable groups behind

1

Use the nearest safe route

2

No elevator during a fire

3

Help those who need it if possible

4

Note: Help must be safe, and you must not expose yourself or others to greater danger

Communication During Emergencies

Clarity reduces fear and confusion

**Short, clear
phrases**

**Calmly,
without
shouting**

**One
instruction at a
time**

**A gesture or
accompanimen
t when needed**

**Make sure they
understood**

**Do not leave
them if they
are confused**

**Ask for help
from someone
who knows
them**

Awareness Message: The way you speak during an emergency can help calm the person and speed up the response

Advance Preparation for the Family

A simple, clear plan

Training the family on the alarm

5

Knowing the number 999

6

Reviewing the plan periodically

7

Knowing the home's exits

1

An outdoor assembly point

2

Designating who helps the vulnerable

3

Keeping medicines and supplies

4

Important Message: An emergency is not the time to discover who needs help — that must be known in advance

Preparedness in Schools and Organizations

An important organizational role

Updating case data

A plan that accounts for everyone

Training the supervisors

Clear assembly points

Routes free of obstacles

Periodic evacuation drills

Coordination with parents

Note: Protecting privacy does not conflict with preparedness when information is organized correctly

During Weather Events or Floods

An additional risk for these groups

Keep them in a safe place

No children playing in the water

Providing medicines

Avoiding going out except when necessary

An available means of communication

Do not leave them alone

Call 999 in case of danger

Awareness Message: These groups need monitoring before, during, and after the weather event

During a Fire or Smoke

A greater risk for those with difficulties

Evacuate them via the safe route

1

No elevator during a fire

2

Do not expose them to thick smoke

3

Close the doors behind you

4

Head to the assembly point

5

Report anyone who cannot get out

6

Call 999 in case of danger

7

Note: If evacuation is impossible, inform the emergency services of the exact location and follow the instructions

Common Mistakes to Avoid

Actions that increase the danger

**Leaving
children
unsupervised**

**Assuming
everyone
knows**

**Moving an
injured person
unnecessarily**

**Using the
elevator during
a fire**

**Crowding
around the
person in need**

**Filming the
cases**

**Ignoring
medicines and
devices**

**Delaying
calling 999**

Important Message: Unorganized help can cause confusion, but a clear plan protects everyone

The Role of the Community

Protection is a shared responsibility

**Helping those
in need safely**

**Reporting
hazards**

**Do not crowd
or film**

**Clear corridors
and exits**

**Making way for
the responders**

**Guiding
children and
the elderly**

**Respecting
privacy and
dignity**

Awareness Message: An aware community is one that protects its most vulnerable members during emergencies

Do's and Don'ts to Protect Vulnerable Groups

Correct Practices and Others to Avoid

Don't ×

Do not leave them alone

1

No elevator during a fire

2

Do not move an injured person unnecessarily

3

Do not crowd around them

4

Do not film the cases

5

Do not delay requesting help

6

Do not assume evacuation is possible

7

Do ✓

Prepare an advance plan for those in need

1

Teach children the number 999

2

Account for the needs of the elderly

3

Keep the corridors clear

4

Help those in need safely

5

Inform the responders about those trapped

6

Respect the privacy of the person in need

7

Interactive Scenarios

A practical application of what you have learned

Scenario 2

A child gets lost from their family at a crowded event

Correct Action: Inform the organizers or security immediately, keep the child in a safe place, and do not let them wander alone

Scenario 1

A fire alarm and you are with an elderly person who needs more time

Correct Action: Help them if it is safe, use the stairs not the elevator, and inform the responders of the need for support

Scenario 4

The children want to play near accumulated water

Correct Action: Stop them, keep them in a safe place, and make them aware of the danger of accumulated or flowing water

Scenario 3

A person of determination needs help with evacuation

Correct Action: Ask them about the best way, help them according to the plan, and without exposing them or yourself to danger

Test Your Knowledge

Quick Questions to Assess Your Understanding

Q1: Why do vulnerable groups need a special plan?

Answer: Because they may need extra time or assistance to move, understand, or communicate

Q2: What do you do with a person who cannot evacuate during a fire?

Answer: Help them if it is safe, inform the responders of their location, and call 999 in case of danger

Q3: Is it acceptable to use the elevator to help the elderly during a fire?

Answer: No, the safe evacuation routes and the specialists' instructions must be followed

Q4: What is the community's role in protecting these groups?

Answer: Safe assistance, reporting hazards, not crowding, and making way for the responders

Thank You

Planning, safe support, and respect for dignity protect the most vulnerable members of the community

Plan in advance • Do not leave them alone • Help safely • Respect privacy • Call 999

"Protecting vulnerable groups is a humanitarian and community responsibility that begins with preparation before emergencies"
