

Safe Evacuation in Schools

Student awareness during emergencies is the foundation of safety

"Safe evacuation depends not only on speed, but on calmness and following instructions"

Why do we learn evacuation?

An emergency may happen at any time and we must be prepared

Protecting lives

The priority of every emergency plan

Reducing injuries

Through an organized response

Preventing chaos

Avoiding stampedes

Supporting teachers

In organizing students

Aiding responders

In emergency operations

Assembly Point

Accounting for everyone

Remember: Practicing evacuation makes you better prepared during emergencies

When do we need to evacuate?

Situations that require leaving the school building

Hearing the fire alarm

Presence of smoke

A fire breaks out

Gas leak or hazardous material

Instruction from administration

Any emergency that requires leaving

Important message: Don't wait to see the danger; follow instructions as soon as you hear the alarm

Correct behavior when you hear the alarm

Stop your activity and respond to the teacher's instructions

Stay calm

1

Stop talking and moving

2

Listen to the teacher's instructions

3

Leave your bag and belongings

4

Line up with your classmates in order

5

Exit calmly without pushing

6

Use the nearest safe exit

7

Head to the assembly point

8

Remember: Belongings can be replaced, but safety cannot

What should be avoided during evacuation?

Behaviors that increase danger and delay exit

Running in the corridors

Pushing classmates

Going back for bags

Using the elevator

Taking photos during emergencies

Leaving the group

Opening doors without permission

Returning after exiting

Golden rule: Exit calmly, stay with your group, and do not return to the building

Evacuation routes and emergency exits

Designed to help students exit safely

Identify the nearest exit

Know an alternative exit

Do not block emergency doors

Do not place bags in corridors

Follow the guidance signs

Use the stairs only

Message: A corridor free of obstacles means a faster and safer evacuation

If you are not in the classroom when the alarm sounds

You may be in the library, cafeteria, or corridors

Do not return to the classroom

1

Join the nearest group

4

Head to the nearest safe exit

2

Follow the nearest teacher's instructions

5

Do not use the elevator

3

Inform the supervisor at the assembly point

6

Interactive question: If you are in the library and hear the alarm, exit from the nearest exit and do not return to the classroom

Assembly Point

The safe place outside the building where students gather

Confirming everyone is safe

1

Identifying missing students

2

Organizing classes away from danger

3

Preventing unauthorized return

4

Assisting emergency teams

5

Staying until permission to return is given

6

Correct action: Stay at the assembly point with your class until the supervisor allows you to return

The student's role during evacuation

Every student has a role in a successful evacuation

Staying calm

**Following the
teacher's
instructions**

**Not pushing
classmates**

**Not stopping in
corridors**

**Not returning
to the building**

**Staying with
the class**

**Reporting
missing
persons**

Message: Responsible behavior during evacuation protects everyone

The role of the teacher and supervisor

Guiding students and organizing their safe exit

Calming the students

Directing the class to the safe exit

Preventing pushing and shoving

Ensuring the route is followed

Accompanying students to the assembly point

Taking attendance

Reporting observations to administration

Remember: Following the teacher's instructions is an essential part of your safety

What to do when there is smoke during evacuation

Smoke can obstruct vision and breathing

Do not enter a corridor filled with smoke

1

Do not open a door with heavy smoke

4

Use a safe alternative route

2

Move away from the source of danger

5

Follow the teacher's instructions

3

Inform the supervisor if you cannot exit

6

Important message: Smoke is dangerous even if you don't see flames

Interactive Scenarios

Practical application of what you learned

Scenario 1

You heard the alarm while in the restroom

Correct action: Exit from the nearest safe exit and inform the supervisor at the assembly point

Scenario 2

You forgot your bag or device in the classroom

Correct action: Do not return to the building; safety is more important than belongings

Scenario 3

A classmate is running and pushing students while going down

Correct action: Move away from the crowd and inform the teacher or supervisor

Scenario 4

You arrived at the assembly point but were outside your class

Correct action: Inform the teacher or supervisor immediately

Test your knowledge

Quick questions to assess your understanding

Q1: Do we use the elevator during a fire?

Answer: No, we use the stairs only

Q2: Do we return to the building after exiting to get our bag?

Answer: No, because the danger may still be ongoing

Q3: What do you do if you are outside the classroom when the alarm sounds?

Answer: Head to the nearest safe exit, then inform the supervisor at the assembly point

Q4: Where do we go after evacuation?

Answer: To the designated assembly point

Q5: Why do we not run during evacuation?

Answer: Because running may cause stampeding and injuries

Thank you

Safe evacuation is everyone's responsibility

Hear the alarm • Leave your belongings • Exit calmly • Stairs only • Assembly point

"Your calmness and commitment during evacuation may save your life and the lives of those around you"
