

Culture of Reporting Hazards in Schools

Early reporting protects everyone

"Reporting hazards is responsible behavior that helps protect students and school staff"

Why do we need a culture of reporting?

Accidents may start from a small observation that wasn't reported

Preventing accidents

Before they occur

Safeguarding safety

Of students and staff

Quick response

To hazards

Building responsibility

In the school environment

School readiness

For emergencies

Remember: A hazard reported early can be handled before it causes an injury

What counts as a hazard at school?

Any situation or behavior that could lead to injury

Wet floors

**Broken or sharp
glass**

Damaged wiring

Blocked exits

**Obstacles in
corridors**

**Unauthorized
use**

**Dangerous
behaviors**

Smoke or heat

Message: A hazard is not always large and obvious; sometimes it starts with a small detail

When should you report?

Immediately when you notice anything that threatens safety

**Smoke or
burning smell**

**Damaged
electrical
wiring**

**Obstacle in
corridors or
stairs**

**Blocked
emergency
door**

**Liquids on the
floor**

Broken glass

**Injured
student**

**Faulty safety
equipment**

**Behavior that
endangers
others**

Remember: Don't wait for a hazard to repeat or cause an accident — report immediately

Who do you report to?

The right person ensures fast handling

Teacher in the
classroom

Corridor or
yard
supervisor

School
administration

Safety officer

School nurse

Bus supervisor

Lab technician

Important: If the hazard is urgent, inform the nearest official immediately, without delay

How do you report properly?

A clear and specific report ensures fast handling

Good example

"There is liquid on the corridor floor next to the science lab"

Unclear example

"There's something dangerous over there"

Move away from the source of danger

1

Do not touch or try to fix it

2

Tell the nearest teacher or supervisor

3

Specify the exact location

4

Describe the type of hazard clearly

5

Follow instructions after reporting

6

What not to do when you spot a hazard

Random action may increase the danger

**Do not touch
electrical
wiring**

**Do not try to fix
it yourself**

**Do not pick up
glass with your
hands**

**Do not
approach
smoke**

**Do not film or
gather around**

**Do not cause
panic**

**Do not ignore
the hazard**

Key rule: Move away, report, and follow instructions

Reporting fire and electrical hazards

Requires fast reporting and staying away

Burning smell

**Smoke in any
area**

Unusual heat

**Damaged
wiring**

**Overloaded
outlets**

**Unauthorized
use of the
extinguisher**

**Flammables
near heat
sources**

Warning: Do not try to unplug or operate electrical devices if you see a danger sign

Reporting movement and injury hazards

Falls and trips can be prevented by early reporting

Wet floor

**Obstacles in
corridors**

**Bag in the
walkway**

Broken tiles

**Unstable chair
or table**

**Broken door or
window**

**Injured or
unwell student**

Message: Reporting a minor hazard may prevent an injury to one of your classmates

Reporting isn't blaming

A responsible preventive action, not a complaint

Protecting everyone

The primary goal of reporting

Resolving the hazard

Quickly and effectively

Don't wait for others

Report it yourself

Protecting your classmate

And others

A safe environment

For everyone

Awareness message: When you report a hazard, you help prevent an accident before it happens

Do and Don't when reporting

Right practices and ones to avoid

Don't ×

Do not touch the hazard

1

Do not try to fix it yourself

2

Do not film the scene

3

Do not gather around the hazard

4

Do not cause panic

5

Do not ignore the hazard

6

Do ✓

Report immediately when you notice

1

Describe the location clearly

2

Use specific words

3

Move away from the danger

4

Follow the official's instructions

5

Help move others away

6

Interactive Scenarios

Practical application of what you learned

Scenario 1 You see liquid on the corridor floor

Correct action: Move away and inform the nearest teacher or supervisor

Scenario 2 You see exposed electrical wiring in the classroom

Correct action: Do not touch them, and inform the teacher immediately

Scenario 3 The emergency door is blocked by some items

Correct action: Inform administration or the safety officer to remove the obstacle

Scenario 4 A student is using safety equipment without authorization

Correct action: Inform the supervisor — safety equipment is for emergencies only

Test your knowledge

Quick questions to assess your understanding

Q1: What do you do if you see a hazard at school?

Answer: Move away from the source and inform the official immediately

Q2: Do you try to fix damaged electrical wiring yourself?

Answer: No, you must inform the responsible official

Q3: Why should you specify the hazard's exact location?

Answer: So it can be handled quickly and correctly

Q4: Is reporting a hazard considered a complaint?

Answer: No, reporting is a responsible preventive action

Q5: What do you do if a hazard is near other students?

Answer: Inform the official and move away, without putting myself at risk

Thank you

Reporting hazards is everyone's responsibility

Notice • Move away • Report • Describe the location • Follow instructions

"Your early report may prevent an accident and protect the lives of those around you"
