

Home Fire Prevention

Awareness protects the family and property

"Home fire prevention begins with safe daily behavior inside the home"

Why is home fire prevention important?

Fires start from a simple, avoidable act

Protecting lives

Every family's priority

Protecting property

And the home

Reducing fires

And preventing them

Family awareness

And its members

Preparedness

To act during emergencies

Remember: Most home fires can be prevented through attention and following safety guidelines

Top causes of home fires

Often linked to neglect or unsafe use

Unattended cooking

Overloaded outlets

Damaged wiring

Unattended candles

Flammables near heat

Poor storage

Unsafe heater use

Neglecting maintenance

Message: Each of these causes can be controlled through prevention and monitoring

Kitchen safety

The home area most associated with fire risks

**Don't leave
cooking
unattended**

**Keep
flammables
away**

**Clean grease
buildup**

**No water on oil
fires**

**Turn off the
heat when
done**

**Keep children
away from the
stove**

**Report any
smoke you
notice**

Remember: Continuous monitoring of cooking is one of the most important ways to prevent home fires

Electrical safety at home

Unsafe use can cause fires and injuries

Do not overload outlets

No damaged cords or plugs

Unplug appliances not in use

Keep cords away from carpets

Do not touch with wet hands

Use approved chargers

Report overheating and odors

Message: Do not try to fix electrical faults yourself; call a specialist

Safety when using heat sources

Heaters, candles, and ovens need attention

**Keep them away from
curtains and furniture**

**Do not leave candles
unattended**

**Put them out before
sleeping**

No heaters in hallways

No grills inside the home

Ensure good ventilation

Remember: A small heat source can cause a major fire if left unattended

Smoke alarms and escape plan

Early warning and preparation save lives

**Install smoke
alarms**

**Test them
regularly**

**Teach the
family the
alarm sound**

**Identify two
exits from each
room**

**Set an outside
meeting point**

**Practice the
plan with the
family**

**Do not return
home without
permission**

Message: Early warning and an escape plan can save lives

Safe storage of flammable materials

Poor storage increases the chance of fires

Keep them away from heat sources

Keep them in their original containers

No fuel inside the home

Away from children

No paper near outlets

Dispose of damaged items safely

Remember: Safe storage is an essential part of home fire prevention

What do you do if you notice warning signs?

They may appear before a fire and should be taken seriously

Correct action

Move away from the source of danger

1

Do not touch damaged wiring

2

Inform family members immediately

3

Cut the power safely

4

Call 999 in immediate danger

5

Burning smell

**Unusual sound
from a device**

Light smoke

Gas leak

Unusual heat

**Frequent
power outages**

What to do when a fire breaks out

Life safety is the priority

Stay calm

1

Alert family members

2

Leave immediately if it spreads

3

Use the nearest safe exit

4

Do not use the elevator

5

Head to the meeting point

6

Do not return for any reason

7

Call 999 from a safe location

8

Important message: Do not risk your life for property

Using a fire extinguisher at home

Helps control a small fire at its start

Pull

The safety pin

Aim

The nozzle at the base of the fire

Squeeze

The handle

Sweep

From side to side

⚠ **Use from 2-3 meters away**

⚠ **Keep an exit route behind you**

⚠ **Do not delay evacuation**

Top priority: Safe exit first, then call emergency services

Do and Don't for home fire prevention

Right practices and ones to avoid

Don't ×

Don't leave heat sources unattended

1

Do not overload outlets

2

No damaged wiring

3

No water on oil fires

4

Don't go back inside after exiting

5

Don't leave children unsupervised

6

Do ✓

Watch cooking continuously

1

Unplug appliances not in use

2

Test the smoke alarm

3

Keep flammables away

4

Store materials safely

5

Create a family escape plan

6

Interactive Scenarios

Practical application of what you learned

Scenario 1

A burning smell from an electrical appliance

Correct action: Turn the appliance off safely, cut the power, and inform family members

Scenario 2

Oil caught fire while cooking

Correct action: No water — cover the pan with a suitable lid safely, and call for help

Scenario 3

You hear the smoke alarm while sleeping

Correct action: Wake the family and exit immediately to the outside meeting point

Scenario 4

A lit candle near a curtain

Correct action: Move it away or extinguish the candle safely, and don't leave it

Test your knowledge

Quick questions to assess your understanding

Q1: Is it allowed to leave cooking unattended?

Answer: No, cooking must be monitored continuously

Q2: What do you do when you hear the smoke alarm?

Answer: Exit immediately to the meeting point and do not return home

Q3: Do we use water on oil or electrical fires?

Answer: No, because it can increase the danger

Q4: Why must you keep an exit route behind you when using an extinguisher?

Answer: So you can leave immediately if the fire isn't controlled

Q5: What is the most important step for preventing home fires?

Answer: Daily attention, monitoring heat sources, and reporting

Thank you

Home fire prevention is everyone's responsibility

Watch cooking • Unplug appliances • Test the alarm • Keep heat away • Escape plan • 999

"A safe home starts with family awareness and commitment to safety"
