

Smoke Alarms and Escape Plan

Early warning and a clear plan save lives

"A working alarm + a clear escape plan = precious time to exit safely"

Why are smoke alarms important?

Smoke spreads fast and is hard to notice while sleeping

Early warning

When smoke is present

Quick exit

For the family safely

Less exposure

To smoke

Alert while sleeping

The most dangerous time

Extra time

To act correctly

Remember: Every minute matters during a fire, and early warning can make a huge difference

Where do smoke alarms get installed?

Choosing the right spots improves alarm effectiveness

Inside every bedroom

Outside sleeping areas

On every floor

Near corridors

Where the alarm can be heard

According to manufacturer's instructions

Important message: The alarm sound must reach every family member, especially while sleeping

Testing and maintaining smoke alarms

Having the device isn't enough; it must work consistently

Test the alarm regularly

Replace the batteries

Clean it of dust

Do not cover or disable it

Replace it at end of life

Ensure it can be heard while sleeping

Remember: An alarm that doesn't work serves no purpose

What do you do when you hear the smoke alarm?

Take it seriously; don't ignore it

Stop any activity immediately

1

Do not carry personal items

5

Alert family members

2

Head to the meeting point

6

Exit quickly and calmly

3

Do not return home after exiting

7

Use the nearest safe exit

4

Call 999 from a safe location

8

Important message: Don't wait to see smoke or flames; the alarm means act immediately

What is an escape plan?

A family plan for safe exit during emergencies

Knowing the exits

Every exit in the home

Two exits per room

Main and alternative

Meeting point

A designated outside spot

Family training

On the plan

Emergency contact

Knowing the number 999

No going back

After exiting

Remember: A clear plan reduces hesitation and confusion during emergencies

Identifying escape exits

Every person knows the exit route from every room

A main exit from every room

A safe alternate exit

Doors and windows that open easily

No furniture blocking exits

Corridors free of obstacles

Teach children the exit routes

Message: A blocked exit during an emergency can hinder escape

The outside meeting point

The safe place for family members to meet after exiting

Outside the home

At a safe distance

Clear to every family member

A nearby fixed location

Away from emergency vehicle paths

Stay until instructed

Remember: The meeting point helps confirm everyone is safe

Practicing the escape plan

Makes the family better prepared to act correctly

Regular drills

At different times

Teach children to exit

Verify the meeting point

Review the plan when
changes occur

Discuss what to do after
exiting

Message: Practice ahead of time makes emergency response faster and calmer

If there is smoke inside the home

Smoke can be more dangerous than flames

Stay low near the ground in heavy smoke

1

Don't open a door with smoke or heat

4

Move to the nearest safe exit

2

Do not use the elevator

5

Close doors behind you

3

Call 999 from a safe location

6

Important message: Avoid inhaling smoke as much as possible, and focus on safe exit

What not to do while escaping

Actions that delay exit or increase danger

**Do not return
after exiting**

**Do not search
for items**

**Don't fight an
out-of-control
fire**

**Don't open
doors without
checking**

**Do not use the
elevator**

**Do not hide
inside rooms**

**Do not ignore
the alarm**

Golden rule: Get out, stay out, and call for help

Children and the elderly in the escape plan

Some family members need extra help

**Teach children
the alarm
sound**

**No hiding when
the alarm
sounds**

**Assign
someone to
assist the
elderly**

**Assist people
of
determination**

**Suitable
escape routes**

**Medications in
an organized
location**

**Review the
plan with
everyone**

Remember: A good plan accounts for every family member's needs

Do and Don't

Right practices and ones to avoid

Don't ✕

Do not disable the alarm

1

Don't cover it or remove the battery

2

Don't block exits

3

Do not return home after exiting

4

Don't delay evacuation for belongings

5

Don't ignore the alarm sound

6

Do ✓

Install smoke alarms

1

Test them regularly

2

Create a clear escape plan

3

Identify two exits from each room

4

Agree on a meeting point

5

Practice with the family

6

Interactive Scenarios

Practical application of what you learned

Scenario 1 You hear the smoke alarm while sleeping

Correct action: Alert family members and exit immediately to the outside meeting point

Scenario 2 The main exit is blocked by smoke

Correct action: Use the alternate exit identified in the escape plan

Scenario 3 You exited then remembered an important item inside

Correct action: Do not return; wait for the authorities

Scenario 4 The alarm doesn't work when you test it

Correct action: Inform the responsible person to replace the battery or unit

Test your knowledge

Quick questions to assess your understanding

Q1: What do you do when the smoke alarm sounds?

Answer: Exit immediately to the outside meeting point

Q2: Is it allowed to return home after exiting?

Answer: No, stay outside until you're allowed to return

Q3: Why do we identify two exits from each room?

Answer: To use the alternate exit if the first is unsafe

Q4: Where is the meeting point?

Answer: Outside the home and at a safe distance from the building

Q5: Why do we test smoke alarms regularly?

Answer: To confirm they work and sound a clear alert when needed

Thank you

Early warning and an escape plan are everyone's responsibility

Install the alarm • Test it • Two exits per room • Meeting point • Practice • 999
