

Home Swimming Pool Safety

Constant supervision... a safer environment

"A home pool requires constant supervision and preventive measures to protect the family"

Why is home pool safety important?

Pools can be dangerous without supervision

Drowning prevention

The top priority

Protecting children

From unsafe access

Reducing injuries

Slips and falls

Family awareness

Of safety rules

Preparedness

To act during emergencies

Remember: Drowning can happen quickly and silently, so constant supervision is essential

Top home pool hazards

Lack of supervision and protective measures

Children without supervision

No barrier or safety gate

Wet floors

Running and rough play

Unsuitable equipment

Poor swimming skills

Lack of emergency knowledge

Electricity near water

Message: Having a home pool means ongoing responsibility and prevention

Constant supervision of children

The most important step for drowning prevention

Don't leave them unsupervised

Assign an adult to watch

No distraction with phones

Floaties don't replace supervision

Keep them within sight

Prevent entry without an adult

Remember: Effective supervision means full attention, not just being present

Barriers and safety gates

Help prevent unsupervised access

Install a barrier around the pool

A self-closing gate

Ensure the gate is closed

No chairs near the barrier

Inspect it regularly

Keys away from children

Message: The barrier doesn't replace supervision, but it reduces unsafe access

Preventing slips and falls

Wet floors increase injuries

Avoid running around the pool

Keep the floor dry

Non-slip flooring

Keep toys out of pathways

Suitable footwear

Report any slippery area

Remember: Calm behavior around the pool reduces slips and injuries

Safety and rescue equipment

Help speed up emergency response

A proper life ring

A long pole or rescue tool

First aid kit

A communication device nearby

Safety guidance board

Emergency numbers

Proper lighting at night

Message: Check equipment readiness regularly and show the family where they are

Electrical safety around the pool

Water and electricity are a dangerous mix

Keep appliances away from the pool

No connections near water

Don't touch with wet hands

Approved outdoor fittings

Report damaged wiring

Don't fix anything yourself near water

Message: Water and electricity are a major danger when they meet

Safe behavior while swimming

Respecting pool rules protects everyone

**Don't swim
alone**

**Don't push
others**

**No jumping in
non-
designated
areas**

**Use equipment
properly**

**Don't enter
when tired**

**Follow the
supervisor's
instructions**

**Exit during
thunder**

Remember: Safe swimming starts with respecting pool rules

What to do during a drowning

Act quickly without putting yourself in danger

Call 999

5

Follow emergency instructions

6

Begin first aid if trained

7

Call for help immediately

1

Don't jump in to rescue if you're not trained

2

Use a life ring to reach them

3

Bring the person out safely

4

Important message: Saving others doesn't mean risking your own life

Protecting the most vulnerable

Need extra care and monitoring

Children

The elderly

People of
determination

Non-swimmers

People with
special health
conditions

Provide a
companion or
supervisor

Use assistive
equipment

Message: Real safety considers every family member's needs

Do and Don't at home pools

Right practices and ones to avoid

Don't ✗

Don't leave children unsupervised

1

Don't rely on floaties

2

Don't run around the pool

3

Don't push others into the water

4

No electrical appliances near the pool

5

Don't swim alone

6

Do ✓

Watch children continuously

1

Use barriers and safety gates

2

Keep rescue equipment ready

3

Keep floors safe

4

Keep electricity away from water

5

Call emergency services when needed

6

Interactive Scenarios

Practical application of what you learned

Scenario 1

A child is heading toward the pool without an adult

Correct action: Stop them immediately and inform the person in charge of the home

Scenario 2

A wet, slippery floor around the pool

Correct action: Inform the family and request cleanup or a warning sign

Scenario 3

Someone is struggling while swimming

Correct action: Call for help, use a rescue tool, and contact emergency services

Scenario 4

An electrical connection near the pool

Correct action: Move away and inform the responsible person to remove it safely

Test your knowledge

Quick questions to assess your understanding

Q1: Do floatation devices replace watching children?

Answer: No, direct supervision is always essential

Q2: What do you do if you see someone struggling in the water?

Answer: Call for help, use a rescue tool, and contact emergency services

Q3: Why do we keep electrical appliances away from the pool?

Answer: To reduce the risk of electric shock

Q4: Is running around the pool safe?

Answer: No, because it can cause slips and falls

Q5: What's the most important step to protect children around pools?

Answer: Constant supervision and preventing unsafe access

Thank you

Home pool safety is everyone's responsibility

Watch children • Don't swim alone • Rescue tools ready • Barriers • Keep electricity away • 999
