

Microwave Safety

Proper use... and protection from risks

"The microwave is a useful home appliance, but it needs proper knowledge and following instructions"

Why is microwave safety important?

Improper use can lead to burns or fires

Burn prevention

Food and steam

Suitable containers

And approved

Reducing faults

Electrical

Protecting children

And family members

Protecting the appliance

And the home

Remember: Safe use starts with reading instructions and staying attentive while running

Top microwave hazards

Arise from improper use or lack of monitoring

Heating at high power

Steam escaping from covers

Non-designated containers

Putting metals inside

Running it empty

Food residue buildup

Damaged appliance

Children using it unsupervised

Message: Every home appliance needs conscious use and ongoing monitoring

Suitable and unsuitable containers

Choosing the container reduces damage and fire risk

Avoid ×

Metals or aluminum

1

Non-microwave-safe plastic

2

Cracked containers

3

Tightly sealed containers

4

Use ✓

Containers marked microwave-safe

1

Glass or ceramic plates

2

Lids that allow steam to escape

3

Heat-resistant containers

4

Key rule: Do not put any container in the microwave unless it is microwave-safe

Safety when heating liquids and food

Steam can cause burns even when invisible

**Stir the food
after heating**

**Let it rest
before eating**

**Open covers
carefully**

**Don't heat
liquids for too
long**

**Use heat-
resistant
gloves**

**Test the
temperature of
children's food**

**Avoid sealed
containers**

Remember: Hot steam can cause burns even when invisible

Items not to put in the microwave

They can damage the appliance or start a fire

Metals

Aluminum foil

**Dishes with
metal edges**

**Non-designated
paper bags**

**Sealed
containers**

**Non-microwave-
safe plastic**

Metal utensils

**Eggs in their
shells**

Important message: If you're unsure whether a container or item is safe, don't put it in the microwave

Safe use for children

Supervision and guidance when heating items

No use without supervision

Teach them safe use

Make sure the container is cool

Warn them about steam risks

Place the appliance safely

No hot containers within their reach

Message: Supervision and guidance protect children from burns and injuries

Cleaning and maintenance

Residue buildup can cause odors or smoke

**Clean it
regularly**

**Wipe spills
after the
appliance cools**

**No harsh
cleaning
agents**

**Check the
door's
condition**

**Don't use it if
the door
doesn't close**

**Report any
malfunction**

**Don't repair it
yourself**

Remember: A clean, sound microwave is safer for daily use

Warning signs during use

Signs that require immediate stop

Burning smell

**Smoke inside
the appliance**

Unusual sound

**Flashing or
sparks**

**Heat in the
plug**

**Damage in the
door**

**Frequent
power outages**

Correct action: Stop use safely, unplug the appliance, and request inspection from a specialist

What to do if smoke or fire appears

Avoid opening the door right away

Do not use water

5

Leave if the smoke continues

6

Call 999 from a safe location

7

Stop the operation safely

1

Unplug the appliance

2

Leave the door closed

3

Move family members away

4

Important message: Opening the microwave door during smoke or flames can spread the fire

Do and Don't when using the microwave

Right practices and ones to avoid

Don't ✗

No metals or aluminum

1

No non-designated containers

2

Don't run it empty

3

Don't heat sealed containers

4

No children unsupervised

5

No water on electrical fires

6

Do ✓

Use microwave-safe containers

1

Follow the manufacturer's instructions

2

Watch the appliance while running

3

Open covers carefully

4

Clean the appliance regularly

5

Unplug it if you notice a fault

6

Interactive Scenarios

Practical application of what you learned

Scenario 1 You notice smoke inside the microwave

Correct action: Stop the operation, leave the door closed, unplug it, and call for help

Scenario 2 Someone wants to heat food in a metal container

Correct action: Stop them and choose a microwave-safe container

Scenario 3 A child wants to take out a hot container

Correct action: An adult should help with heat gloves and watch for steam

Scenario 4 The microwave door doesn't close properly

Correct action: Stop using it and request inspection from a specialist

Test your knowledge

Quick questions to assess your understanding

Q1: Is it allowed to put metals in the microwave?

Answer: No, they can damage the appliance or cause a fire

Q2: What do you do if smoke appears inside the appliance?

Answer: Stop the operation, leave the door closed, and unplug it safely

Q3: Why should covers be opened carefully?

Answer: To avoid exposure to hot steam and burns

Q4: Is it allowed to run the microwave empty?

Answer: No, because it can damage the appliance

Q5: What do you do if you notice damage in the door?

Answer: Stop using it and request inspection from a specialist

Thank you

Microwave safety is everyone's responsibility

Suitable containers • No metals • Open carefully • No unsupervised children • Clean it • 999
