

Home Injury Prevention

A safe home... a safer family

"Prevention starts with organizing the home, watching for hazards, and supervising vulnerable groups"

Why is home injury prevention important?

We spend a lot of time at home, and injuries can happen from neglect

Protecting the family

From daily accidents

Reducing injuries

Falls, cuts, and burns

Protecting groups

Children and the elderly

Preventive awareness

Inside the home

A safe environment

For everyone

Remember: Many home injuries can be avoided through simple, organized steps

Common home injuries

Vary by location and behavior

Falls and slips

Cuts from sharp
objects

Burns from
liquids and heat

Choking on small
objects

Poisoning from
medications and
cleaners

Electric shock

Injuries from
furniture and
glass

Pool and
bathroom
injuries

Message: Knowing the risks is the first step to preventing them

Preventing falls and slips

The most common injuries for children and the elderly

**Dry, clear
floors**

**Lighting in
hallways**

**Secure rugs in
place**

**No items in
walkways**

**Use the
handrail**

**Child gates at
stairs**

Non-slip floors

Remember: A small obstacle in the walkway can cause a serious injury

Preventing cuts and sharp tool injuries

Safe storage and use

**Store knives
safely**

**Don't leave
them at the
edges**

**Use them for
their intended
purpose**

**Keep them
away from
children**

**Don't hide
them in the
sink**

**Dispose of
glass safely**

**Don't pick up
glass with your
hands**

Message: Safe storage of sharp tools reduces home injuries

Burn prevention

Liquids, steam, and heat sources

**Keep liquids
away from the
edge**

**Don't carry hot
items while
holding a child**

**Turn pot
handles inward**

**Keep children
away from the
stove**

**Use heat-
resistant
gloves**

**Unplug the iron
after use**

**Don't leave
heat sources
unattended**

Remember: Burns happen quickly; prevention needs constant attention

Preventing poisoning at home

Medications, cleaners, and chemicals

**Store away
from children**

**In their original
containers**

**Don't put them
in food
containers**

**Read the
instructions**

**Don't mix
cleaning
products**

**Dispose of
expired items**

**999 when in
doubt**

Message: Wrong storage of hazardous materials can lead to a serious accident

Preventing choking

Food, small objects, and toys

**Watch children
while they eat**

**Food in
appropriate
sizes**

**Keep small
parts out of
reach**

**Age-
appropriate
toys**

**No plastic bags
near children**

**Eat calmly
without
playing**

**Learn choking
first aid**

Remember: Small items can be dangerous for children

Electrical safety at home

Safe use and ongoing inspection

**No damaged
plugs**

**No cords in
hallways**

**Don't touch
with wet hands**

**Keep
appliances
away from
water**

**Safety covers
on outlets**

**Don't overload
outlets**

**Call a specialist
for faults**

Message: Electricity needs safe use and ongoing inspection

Protecting children at home

Curiosity and exploration increase risks

Keep medications and cleaners away

Safety locks on cabinets

Don't leave them in the kitchen or pool

Keep sharp tools and lighters away

Secure heavy furniture

Barriers at stairs and windows

Teach them safe behavior

Remember: Protecting children depends on supervision and organizing the home environment

Protecting the elderly and people of determination

Extra arrangements to reduce risk

**Adequate
lighting in
hallways**

**Remove
obstacles**

**Grab bars in
bathrooms**

**Stable rugs
and furniture**

**Items within
easy reach**

**No cords in
hallways**

**Organize
medications
safely**

Message: A safe home considers the needs of all family members

What to do when an injury occurs

Act calmly and call for help

No food for an unconscious person

5

Call 999 in serious cases

6

Follow emergency instructions

7

Stay calm

1

Move the injured person safely away from danger

2

Don't move them if the injury is severe

3

Provide first aid if you're trained

4

Important message: The right action starts with protecting the person and calling for proper help

Do and Don't for injury prevention

Right practices and ones to avoid

Don't ×

- Don't leave spills uncleaned
- Don't leave children unsupervised
- No cleaners in food containers
- Don't pick up glass with your hands
- Don't fix electrical issues yourself
- Don't ignore warning signs

1

2

3

4

5

6

Do ✓

- Keep the home organized
- Dry, clear floors
- Store sharp tools and chemicals
- Watch over children
- Inspect wiring
- Prepare a first aid kit

Interactive Scenarios

Practical application of what you learned

Scenario 1 A wet floor in the hallway

Correct action: Clean it immediately or place a warning until it's cleaned

Scenario 2 A child is trying to open the cleaning cabinet

Correct action: Move them away immediately, close the cabinet, and store it safely

Scenario 3 A glass cup broke on the floor

Correct action: Keep the family away and use proper tools to collect the glass

Scenario 4 Someone fell and is in severe pain

Correct action: Do not move them if the injury is severe, and call emergency services

Test your knowledge

Quick questions to assess your understanding

Q1: Why should hallways be kept clear?

Answer: To reduce the risk of tripping and falling

Q2: Is it allowed to store cleaners in food containers?

Answer: No, they must be kept in their original containers

Q3: What do you do if there is broken glass?

Answer: Keep others away and collect it with proper tools, not by hand

Q4: Do we move the injured person after a hard fall?

Answer: No, if the injury is severe, call for help

Q5: What's the most important way to protect children?

Answer: Constant supervision and keeping dangers out of reach

Thank you

Home injury prevention is everyone's responsibility

Organize the home • Watch children • Store safely • Use carefully • First aid • 999

"A safe home begins with family awareness and a commitment to preventive behavior"
