

Wrong Behaviors That Cause Accidents

Drive Safely... Your Safety Starts With Your Behavior on the Road

"Many traffic accidents don't happen because of the road alone, but because of wrong behaviors that can be avoided with attention and commitment"

Why Do We Care About Traffic Behaviors?

A wrong behavior can turn a simple situation into a serious accident

Reducing Accidents

the Likelihood of Them
Happening

Protecting Lives

and Property

Raising Attention

and Responsibility on
the Road

Reducing Injuries

from Sudden Actions

Respecting the Rules

and Road Users

Safe Driving

for Everyone

Remember: The vehicle is a means of transport, not a place for risk-taking, rushing, or distraction

How Do Wrong Behaviors Lead to Accidents?

A wrong decision at a time that requires full attention

Ignoring traffic signals

5

Driving while fatigued or angry

6

Not watching for pedestrians and bicycles

7

Exceeding the allowed speed

1

Using electronic devices

2

Changing lanes without signaling

3

Tailgating the vehicle ahead

4

Note: A few seconds of distraction or rushing can be enough for an accident to happen

Speeding

The leading behavior that increases the likelihood of accidents and injury severity

Reduced response time to surprises

1

Increased stopping distance

2

Difficulty controlling in emergencies

3

Increased collision severity

4

Difficulty noticing pedestrians

5

A higher chance of losing control

6

Correct Action: Comply with the speed limits, and slow down in residential areas, intersections, and weather conditions

Using Electronic Devices While Driving

It distracts the eyes, hands, and attention at the same time

Reading or
writing
messages

Browsing apps
and
notifications

Filming the
road while
driving

Calls that
cause poor
focus

Adjusting the
destination
and maps

Being
preoccupied
with vehicle
screens

Being
preoccupied
with side
notifications

Awareness Message: No message is more important than your safety and the safety of road users

Not Leaving a Safety Distance

Tailgating reduces the chance of stopping safely

**Increased
chance of a
rear-end
collision**

**Reduced
ability to avoid
surprises**

**Increased
tension
between
drivers**

**Difficulty
stopping in
congestion**

**Extra danger in
rain and fog**

**Difficulty
controlling at
high speeds**

**An effect on
the vehicles
behind**

Correct Action: Leave a sufficient distance, and increase it at high speeds or in poor visibility

Changing Lanes Incorrectly

It can lead to a side collision or confuse road users

Changing lanes suddenly

Not using turn signals

Not checking the mirrors

Ignoring blind spots

Frequent rapid switching

Cutting off others

Changing without a safe distance

Correct Action: Use the signal, check the mirrors and blind spots, then change lanes calmly

Ignoring Signals and Road Signs

They are placed to organize traffic and protect road users

Running the red light

Not stopping at a stop sign

Ignoring priority at intersections

Going against the direction of traffic

Parking in non-designated places

Not staying within the lane lines

Ignoring road signs

Note: Ignoring signals doesn't save time; it raises the chance of an accident

Driving While Fatigued or Drowsy

It reduces focus and affects response speed

The Correct Action

- Stop in a safe place •
- Take some rest •
- Don't continue when your focus weakens •
- Avoid long driving without rest •
- Sleep well before trips •

Signs of Fatigue

- Frequent yawning •
- Heavy eyes •
- Poor focus •
- Drifting out of the lane •
- Slow response •

Important Message: Rest before driving is part of safety, not a secondary matter

Driving With Anger or Recklessness

Hasty decisions and aggressive behaviors raise the risk of accidents

Racing and showing off

Dangerous overtaking

Using the horn aggressively

Chasing a vehicle over a dispute

Changing lanes repeatedly

Speeding out of anger

Reacting to provocative behaviors

Correct Action: Stay calm, avoid reacting to provocateurs, and leave a safe space

Not Paying Attention to Pedestrians

Pedestrians are the group most prone to injuries

**Not stopping at
pedestrian
crossings**

**Speeding near
schools**

**Reversing
without
checking the
road**

**Being
distracted in
parking areas**

**Overtaking
near crossings**

**Ignoring
children and
the elderly**

**Not checking
the sides**

Correct Action: Reduce speed, give pedestrians priority, and make sure the road is clear before reversing

Wrong Behaviors in Parking Areas

Parking areas are not danger-free zones

Driving fast in parking areas

Reversing without checking behind

Using devices while moving

Parking in a way that obstructs others

Not watching for children between cars

Opening the door without checking

Not checking the sides

Message: Parking areas require calm driving and full attention

Not Using the Seatbelt

Increases the risk of injury during a sudden stop or accident

Moving the vehicle before fastening the belt

Allowing passengers not to fasten it

Placing the belt behind the back

Placing the belt under the arm

Believing it's unnecessary for short distances

Ignoring rear-seat belts

Leaving children without an appropriate seat

Correct Action: Don't start driving until all passengers fasten their seatbelts correctly

Not Protecting Children Inside the Vehicle

Exposes them to great danger in accidents

Holding the child in your lap while driving

The child sitting without an appropriate seat

A child seat not installed correctly

Letting the child move around while driving

Leaving children alone in the vehicle

Allowing the door or window to be opened

Not monitoring the child while driving

Important Message: Protecting the child inside the vehicle is a fundamental responsibility before the trip begins

Wrong Responses to Accidents or Breakdowns

Some actions increase the danger instead of reducing it

Standing in the middle of the road

Crowding around the accident

Getting out without watching for traffic

Attempting repairs in a dangerous spot

Moving the injured person unnecessarily

Returning to a vehicle at risk of fire

Obstructing the competent authorities

Correct Action: Stay away from the path of vehicles, turn on the signals, and call 999 if there are injuries

Do's and Don'ts in Traffic Behavior

Correct Practices and Others to Avoid

Don't ×

Don't run traffic signals

1

Don't change lanes suddenly

2

Don't tailgate the vehicle ahead

3

Don't drive while fatigued or angry

4

Don't crowd at accidents

5

Don't seat children without protection

6

Don't use the road for showing off

7

Do ✓

Comply with the speed limit

1

Leave a sufficient safety distance

2

Use the signal when changing lanes

3

Fasten the belt before moving

4

Avoid electronic devices

5

Slow down near schools

6

Stop when fatigued

7

Interactive Scenarios

Practical Application of What You've Learned

Scenario 2

The vehicle ahead stopped suddenly while you were very close

Correct Action: Always leave a sufficient safety distance so you can stop safely during surprises

Scenario 1

While driving, a message arrived on the electronic device

Correct Action: Don't use the device while driving, and stop in a safe place if a reply is necessary

Scenario 4

There's a pedestrian crossing ahead in a residential area

Correct Action: Reduce speed, watch for pedestrians, and stop when needed to allow safe crossing

Scenario 3

Another driver did something provocative on the road

Correct Action: Avoid getting angry or chasing, keep a safe distance, and continue driving calmly

Test Your Knowledge

Quick Questions to Assess Your Understanding

Q1: Why is speeding considered a dangerous behavior?

Answer: It reduces response time, increases stopping distance, and raises injury severity

Q2: What is the correct action if you need to use electronic devices?

Answer: Stop in a safe place first, and don't use them while the vehicle is moving

Q3: Why should you leave a safety distance between vehicles?

Answer: To allow enough time and distance to stop or react in any emergency

Q4: What is the action when facing a reckless or provocative driver?

Answer: Avoid getting angry or reacting, leave a safe distance, and focus on driving calmly

Thank You

Wrong behaviors can be avoided with awareness, commitment, and respect for road users

No rushing • No distraction • Safety distance • Respect signals • Your safety first

"Drive safely; your safety and others' safety start with your behavior on the road"
